Description

Hollyland LARK M2S Wireless Microphone System for Cameras and Mobile Devices Tiny pearl-sized and logo-free design easily conceals the microphone, offering a completely discreet and professional appearance—perfect for live streaming, online teaching, weddings, interviews, and presentations. Weighing just 7 grams, it stays securely clipped to your clothing without sagging or drooping, letting you focus on your performance with style and comfort! With exceptional structural stability and durability, LARK M2S’s innovative titanium clip-on design keeps your microphone securely in place, significantly enhancing the comfort and user experience, even during high-intensity activities like sports, cycling, or running. Experience crisp, natural, and crystal-clear sound with 24-bit/48kHz sampling rate. A 70dB Signal-to-Noise Ratio (SNR) minimizes background noise, while the 116dB Maximum Sound Pressure Level (SPL) ensures ultra-low distortion, even with loud audio sources. Perfect for creating professional, true-to-life recordings every time. Advanced ENC technology removes low-frequency noise for polished audio. Easily adjust 2 noise cancellation levels via the LarkSound App. With a 300m (1000ft) MAX range and RF interference-resistant circuit, it provides stable, pristine sound quality even in signal-dense locations like event venues and busy urban areas. With 2 full charges from the charging case, the LARK M2S mobile version offers up to 27 hours of total battery life. Recharge in just 1.5 hours for 9 hours of working time per transmitter/receiver (noise cancellation off), keeping you powered for all-day creativity. LARK M2S Mobile Version with Type-C Plug works seamlessly with iPhone 15/16 series, Android devices and Mac computer via USB C digital outputs. Enjoy plug-and-play recording with uninterrupted playback—perfect for vloggers and creators on the go! Manage all your recording needs effortlessly with the Hollyland LarkSound App. Easily check battery life, adjust volume, monitor connections, and fine-tune noise cancellation levels to customize your recording experience
