Product specification sheet

Product	DJI Mic 3 Wireless Microphone Kit - (2 TX + 1 RX + Charging Case)
SKU	DJI-MIC300
Brand	DJI
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	$299.00
Available quantity	100

Description

HIGHLIGHTS: 4TX + 8RX Capability & Four-Channel Output Adaptive Gain Control for Balanced Volume Three Voice Tone Presets Two-Level Noise Cancelling Dual Band Anti-Interference Lossless Audio Transmission Dual-File 32-bit Float Internal Recording Integrated Timecode for Seamless Editing Small, Lightweight, VersatileThe DJI Mic 3 Transmitter is compact, lightweight, and discreet. It supports bothmagnetic and clip-on attachment methods. The detachable, rotatable clip allows you to flexibly adjust the microphone angle, whether clipped sideways or inverted, ensuring optimal audio capture in any scenario. Premium Audio, SmarterAdaptive Gain Control for Balanced VolumeAutomatic: Automatic mode effectively prevents audio clipping, making it ideal for outdoor environments with dramatic volume fluctuations, such as sporting eventsDynamic: Dynamic mode automatically adjusts gain in response to volume changes, ensuring consistent loudness—ideal for quiet indoor settings like studios. Three Voice Tone Presets To Match Your StyleRegular: Regular is the default setting, offering clean, natural, and balanced audio.Rich: Rich puts extra emphasis on the lows for a fuller, more powerful sound.Bright: Bright highlights the highs, giving your voice extra clarity and sparkle. Two-Level Noise Cancelling for Focused SoundBasic: The Basic level is ideal for quiet indoor settings, reducing fan, air conditioning, and reverb noises while preserving vocal clarityStrong: The Strong level excels in noisy environments, significantly cutting ambient noise for clearer vocals.With the windscreen attached, the transmitter effectively reduces wind noise and other unwanted noise, delivering crisp, clear audio even in windy conditions or noisy environments—ideal for live streaming, vlogging, and more. Robust Performance, Endless Possibilities4 TX + 8 RX for Seamless CollaborationDJI Mic 3’s receiver can connect with up to four transmitters at once, letting you capture four audio sources simultaneously. The main receiver can also sync audio to up to seven additional receivers. Whether it’s a group interview or a multi-camera production, you’ll get crystal-clear audio on every device, making post-production a breeze Flexible, Versatile Channel SettingsThe receiver lets you choose between Mono and Stereo (dual-channel) modes—output audio from each transmitter separately, or merge them into a single track to suit any creative scenario. Four-Channel Output, Effortless EditingFWhen set to Quadraphonic mode, the DJI Mic 3 Receiver—paired with select Sony cameras or computer software—supports independent output of four audio tracks. This enables precise track separation and flexible mixing, giving you greater creative freedom in post-production. Dual-Band Reliability, Rock-Solid TransmissionDJI Mic 3 supports automatic frequency hopping between 2.4 GHz and 5 GHz bands , with a transmission range of up to 400 meters [7]. Its robust anti-interference capabilities ensure stable audio transmission, even in complex wireless environments like trade shows. Dual-File 32-bit Float Internal Recording Internal RecordingNever worry about lost audio—internal recording protects your material fromwireless interference or device failures. With dual-file internal recording, DJI Mic 3 saves both the original track and an algorithm-enhanced version at once , streamlining your workflow and keeping your creative process smooth. 32-bit Float Internal RecordingWith support for 32-bit float internal recording, DJI Mic 3 provides a high dynamic range that not only delivers high-quality recording but also adapts better to complex sound environments. It excels in capturing every nuance of a voice, from quiet whispers to booming decibel levels, providing greater reliability in erratic noise scenarios and more flexibility in post-production. Built-in Timecode for Precise SyncDJI Mic 3 offers high-precision timecode support [10], with the transmitter embedding timecode data during internal recording and the receiver supporting both timecode input and output. With less than one frame of drift over 24 hours , you can instantly align multi-camera footage in post-production, making editing faster and more efficient. Box Contains: x2 DJI Mic 3 Transmitter, x1 DJI Mic 3 Receiver, x1 DJI Mic 3 Charging Case, x1 DJI Mic 3 Mobile Phone Adapter (USB-C), x1 USB-C to USB-C Data Cable, x1 DJI Mic 3 Locking Audio Adapter Cable (3.5mm TRS to TRS), x2 DJI Mic 3 Windscreen (Black/Gray), x2 DJI Mic 3 Windscreen (Black), x2 DJI Mic 3 Magnet, x2 DJI Mic 3 Magnetic Clip, x1 DJI Mic 3 Carrying Pouch
