## Description

HIGHLIGHTS:  12MP Sensor 4032 x 3024 Resolution Wide-Angle Lens 149° Diagonal Field of View Enlaps Tikee Mini With Soft Case. AffordableThe Tikee mini is an economical, high-quality timelapse solution, an ideal compromise for small projects or limited budgets. Compact sizeThe compact, lightweight Tikee mini is easy to install, making it perfect for projects requiring quick and easy set-up. Equipped with a high-sensitivity Sony sensor, Tikee mini offers superior image quality with 4K resolution and an extended field of view (DFOV 149° / HFOV 124°). Thanks to the brightness sensor, you can take pictures only when the light is bright enough. Indoor / OutdoorThanks to its shorter focusing distance than the Tikee 3 PRO+, Tikee mini captures details at close range, ideal for indoor shooting and equally effective outdoors. Weatherproof IP66IP66 certified, Tikee mini is designed to withstand extreme weather conditions, ensuring reliable performance from -10°C to +50°C. Thanks to 4G/LTE, WiFi and GPS connectivity, manage your shooting sequences remotely, automatically send your photos to the secure cloud, and access images wherever you are. Launch a live streaming video session in HD resolution (1280 x 960), and instantly clarify any situation on location. Long-life batteryThe Tikee mini's battery ensures continuous monitoring of your projects even without a power source: its autonomy can last up to 4 months with a 10min interval. Flexible power sourceThe Tikee mini features a built-in battery, and a waterproof connector for connecting an external solar panel and a Tikee charger, offering several power supply options.
