Product specification sheet

Product	DJI Osmo Mobile 7P Smartphone Gimbal (BLACK)
SKU	DJI-ZM700P
Brand	DJI
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	$99.00
Available quantity	100

Description

HIGHLIGHTS: Extendable Smartphone Gimbal Stabilizer Multifunctional Module with Fill Light Magnetic Phone Clamp, Robust Motors 10.6 oz Load Capacity, Built-In Tripod 8.5" Extension Rod ActiveTrack 7.0, Follow Modes Supports Smartphones up to 3.3" Wide ShotGuides, AI Editor Supports Phone Charging via USB-C Control Gimbal/Phone with DJI Mimo App Accurately track subjects while maintaining stable footage with the improved DJI Osmo Mobile 7P Smartphone Gimbal Stabilizer thanks to its quick-launching construction, Multifunctional Module, and ActiveTrack 7.0 technology. The gimbal has a new iteration of the magnetic phone clamp that supports smartphones up to 3.3" wide in a fast mounting interface, as well as the OM Multifunctional Module for improved tracking technology, gesture control, and a fill light. The built-in battery runtime is 10 hours on its own, and it recharges in just 2.5 hours with the USB-C cable. A built-in tripod allows you to place the gimbal on flat surfaces, and a 1/4"-20 mounting thread can accommodate additional accessories. Use the integrated extension rod for more creative shot compositions. Quick-Launching Device Start up the Osmo Mobile 7P by unfolding it and attaching your smartphone via a magnetic clamp to begin shooting. No need to remove your phone from its case; the upgraded clamp supports phones measuring up to 3.3" wide. A built-in intelligent sensor and automatic alignment detect your phone and adjust the gimbal accordingly for optimal balance. The gimbal can support loads up to 10.6 oz. Multifunctional Module The Multifunctional Module adds tracking in your smartphone's native camera app or third-party camera apps without requiring the Mimo app. Attaching the module also unlocks gesture control for hands-free adjustments. An integrated fill light on the module can enhance your low-light shooting. Bluetooth built into the module can connect up to two DJI Mic Mini transmitters to the gimbal without requiring a receiver unit. Gesture Control Show your palm to the Multifunctional Module's sensor and intelligent tracking with start or stop instantly. Make a "V" with your fingers to take a photo or start/stop recording. A double "L" gesture adjusts your framing no matter where you shift in the frame. 3-Axis Stabilization and ActiveTrack 7.0 The Osmo Mobile 7P features improved stability for longer distances using the updated ActiveTrack 7.0, which can automatically track body shapes to track human subjects without needing to make a manual selection. Track subjects even after they leave the frame using automatic zooming and gimbal movements for continuous filming. Smart Capture detects multiple subjects and allows you to effortlessly switch by tapping on your phone's screen. Smooth tracking pinpoints your preferred subject—whether it be a person or a family pet—and maintains continuous tracking regardless of movement or obstruction. Embedded stabilization technology creates shots free of shaking or distortion due to your terrain. Compact, Extendable Form Factor Film with low- or high-angle perspectives Extension rod for additional 8.5" length Ultracompact, foldable design with comfort handgrip Intuitive Onboard Controls Onboard controls include an integrated joystick and other buttons on the handle grip. A system status indicator displays the battery level and gimbal mode. A side wheel allows you to adjust the focal length and zoom in/out on your smartphone via Bluetooth 5.3 connectivity. Press the back trigger three times to switch to selfie mode. Controllable range: 309° pan, 312° roll, 60° tilt Control speed: 120°/s Intelligent Shooting Modes Besides the usual DJI pan/tilt follow modes and SpinShot, the Osmo Mobile 7P also offers intelligent shooting modes for expanded viewing. Utilize Time-Lapse, Motion-Lapse, and Hyper-Lapse to blend time seamlessly. Use three different panorama modes to capture wide expanses. Stretch and compress your video using DynamicZoom and Move In or Move Out modes. Parents and Kids Mode A new feature included with the OM 7P is Parents and Kids Mode, which helps you become your family's photographer. Automatically capture moments with your children, thanks to enhanced kids tracking, and access a variety of templates to create digital keepsakes. Battery Life and Phone Charging An integrated rechargeable battery keeps the Mobile 7P running for 10 hours at a time. Once depleted, it can be recharged in 2.5 hours using the included power cable and USB-C port. When the Multifunctional Module's intelligent tracking is enabled, the gimbal's runtime is reduced to 5 hours. When the fill light is set to maximum brightness, the runtime is reduced to 4 hours. The gimbal's USB-C port can also be used as a power output that charges your smartphone when the gimbal is powered off. DJI Mimo App ActiveTrack 7.0 technology built into the app allows the Osmo Mobile 7P to automatically keep your phone facing you as you move. Use your Apple Watch to view the camera feed, control the gimbal, and enable ActiveTrack remotely. AI-powered one-tap editing and exclusive video templates make creating videos intuitive and easy. ShotGuides analyze your shooting

environment and recommend a shot sequence with a guided tutorial. CineGear ME is DJI ONLY authorized reseller in Lebanon. Contact us via email : info@cinegearme.com or call on +96170019793
