Product	RODE Wireless Micro 2-Person Ultracompact Wireless Microphone System (LIGHTNING)
SKU	WIMICRO-L
Brand	Rode
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$130.00
Available quantity	100

Description

HIGHLIGHTS : 2-Person Interviews, Vlogs & Podcasts 2 x Mini Clip-On Transmitters Built-In Omnidirectional Microphones USB-C Plug-In Receiver Easy Setup with Automatic Pairing Intelligent GainAssist Technology 328′ Range 7-Hr Rechargeable Batteries Works with RØDE Capture Video App Charging Case, Windscreens, USB Cable RODE Wireless Micro 2-Person Ultracompact Wireless Microphone System Get terrific sounding, hands-free audio for your mobile video and streaming productions with the black RODE Wireless Micro, an ultracompact, 2-person wireless microphone system designed for on-the-go creators and content makers. The system includes a pair of tiny, lightweight clip-on transmitters, each with a built-in omnidirectional microphone, along with a single, dual-channel receiver that plugs directly into the USB-C port on your Android or compatible iOS smartphone or tablet. Super-easy to use, the components pair up automatically when powered on to provide reliable wireless transmission at a range up to 328′. Wireless Audio for Everyone RODE Wireless Micro RODE Wireless Micro The tiny transmitters provide a low-profile appearance that won’t distract viewers; they can be clipped to clothing or attached via the included mounting magnets, providing a wide variety of wardrobe-friendly mounting choices. What’s more, each transmitter’s electret-condenser microphone features a forgiving omnidirectional pickup pattern that captures sound in a 360° radius around the capsule, providing consistent audio levels, even when the talent turns away from the mic. RODE’s Intelligent GainAssist Technology takes the guesswork out of setting audio levels, ensuring you get great sound with no onset fuss. Each transmitter will run for up to 7 hours on it’s built-in rechargeable battery. The included charging case provides two additional charges for a total of 21 hours of operating time in the field. Cable-Free Reception RODE Wireless Micro The equally diminutive Wireless Micro dual-channel receiver feeds digital audio directly to your mobile device’s USB-C port, which also supplies the unit with power. Since no awkward cables are required, your mobile rig stays nice and tidy. With impressive system specs, including the ability to handle up to 135 dB SPLs and a 20 Hz to 20 kHz frequency range, RODE has engineered the Wireless Micro to consistently deliver quality, broadcast-ready audio and clear, intelligible speech. The system works with the free RODE Capture video recording app, making it simpler than ever to create quality content that sounds great. A Complete Package In addition to the magnet mounts and sleek charging case with included USB-C charging cable, the set provides a pair of furry windscreens to cut wind noise when you’re working outside.
