Product specification sheet

Product	DJI Mic Mini (2TX + 1RX + Charging case) Black
SKU	DJI-MIC100M
Brand	DJI
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	$99.00
Available quantity	0

Description

HIGHLIGHTS: Small, Ultralight, Discreet High-Quality Audio With Stable Transmission 48-Hour Operation w/ Case DJI OsmoAudio™ Direct Connection for Premium Sound Quality Two-Level Active Noise Cancelling Automatic Limiting to Prevent Audio Clipping Introducing DJI Mic Mini, a wireless microphone that packs powerful performance into an ultralight body. It ensures stable transmission of high-quality audio, boasts extended battery life, and features direct connection with products in the DJI OsmoAudio™ ecosystem. Experience detail-rich sound recording that elevates your content creation experience. With a simple flip of the case, you are ready to add high-quality audio to any project. Small and UltralightComfortable to WearThe DJI Mic Mini Transmitter is small and ultralight, weighing only 10 g, making it comfortable to wear and discreet. With multiple wearing options like magnetic attachment and clip-on, it won’t weigh down your collar or flip outward, even on thin T-shirts, ensuring a more aesthetically pleasing on-camera appearance. All-in-One, Take It AnywhereThe compact DJI Mic Mini features an innovative design for easy storage. The charging case can neatly store two transmitters, one receiver, mobile phone adapters, and windscreens. The windscreens on the transmitters do not need to be removed when stored in the case. The entire set is convenient to use and easy to store. Detail-Rich SoundDJI Mic Mini supports omnidirectional audio recording. The receiver can pair with two transmitters simultaneously. Even when recording multiple sound sources, the mic excels at reproducing detail-rich sound, ensuring the audio you get is always high quality. Two-Level Noise CancellingDJI Mic Mini offers two noise cancellation levels to suit different environments. The Basic level is perfect for quiet indoor settings, reducing fan, air conditioning, and reverb noises while preserving vocal clarity.The Strong level excels in noisy environments, significantly cutting ambient noise for clearer vocals. Automatic Limiting to Prevent Audio ClippingWhen automatic limiting is enabled, DJI Mic Mini automatically lowers the volume if the audio input is too high, preventing clipping and ensuring reliable audio quality. This is especially useful for content creators. 5-Level Gain AdjustmentThe gain can be quickly adjusted in five levels using the dial on the receiver, making operation convenient and efficient. Mono and Stereo RecordingDJI Mic Mini supports both Mono and Stereo (dual-channel) recording. Audio captured by the two transmitters can be output separately or combined into a single track, providing greater flexibility for post-production Safety Track, Extra AssuranceBy enabling a safety track in the DJI Mimo app, DJI Mic Mini can record in dual tracks. The main track records at normal volume, while the second track records at 6 dB lower, helping to protect your audio from issues like clipping and distortion. This ensures you capture usable audio even with fluctuating volumes during live performances. 5-Minute Quick ChargeJust five minutes of charging provides about one hour of use for both the receiver and transmitter, significantly enhancing charging efficiency. Supporting 1.2C fast charging, the receiver and transmitter can be fully charged in approx. 100 and 90 minutes, respectively, so you can quickly get back to work.
