Product	M-Audio BX3BT 3.5" 120W Studio Monitors (Pair)
SKU	cg-42825722069157
Brand	M-Audio
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$210.00
Available quantity	100

Description

HIGHLIGHTS 3.5" Kevlar Woofer 1" Silk-Dome Tweeter 120W Peak Total, 25W RMS per Speaker 80 Hz to 22 kHz Frequency Response Computer-Engineered Waveguide Volume, High- and Low-End Controls Rear Bass Port Includes Acoustic Foam Feet MPC Beats DAW Software Included M-Audio BX3BT Overview Audio engineers, musicians, and music producers in search of a pair of quality studio monitors with Bluetooth should check out the M-Audio BX3BT, a pair of 2-way, studio monitors designed to offer a wide frequency response and easy configuration for producers, podcast creators, mixing engineers, and others who require a critical ear. The BX4BT features an integrated Bluetooth receiver, allowing you to play audio from any Bluetooth device including a turntable, phone, or even a computer to stream a reference mix. The monitor produces a frequency response of 80 Hz to 22 kHz, thanks to two amplifiers feeding a 3.5” Kevlar woofer and 1” silk-dome tweeter. A rear-mounted bass port delivers extended bass response, while the tweeter’s computer-engineered waveguide yields a wide sweet spot and minimized high-frequency scatter. Volume and high- and low-frequency controls are provided, so you can tune the monitor to cooperate with the sound of the room. The monitors have 3.5mm, RCA, and balanced 1/4" jacks, so you have your choice of what kind of device you input into the speakers. At a Glance Bluetooth Connectivity—easily pair with any Bluetooth-enabled device for wireless streaming Black Kevlar low-frequency drivers; 1” natural silk-dome tweeters New computer-optimized tweeter waveguide for precise imaging High-EQ and Low-EQ controls for dialing in the perfect sound Enhanced rear ports for extended low-frequency response Left/right Active Speaker Position switch for configuring which side has volume control Bluetooth, 1/4”, 3.5mm, and RCA inputs for connecting to virtually any audio source Front 3.5mm aux input for quick connection of smartphones or other audio sources Acoustically inert MDF cabinet with bass reflex design for deep, rich sound Includes 3.5mm TS speaker interconnect cable, 3.5mm to 3.5mm TRS cable, and 3.5mm TRS to RCA cable Stream Your Music Do you wish you had the flexibility to stream a reference mix on more than just your hardwired studio monitors? Do you own a Bluetooth turntable but don't have the space to fit the speakers next to them? Get a better listening experience with M-Audio's compact and attractive and Bluetooth-enabled M-Audio BX3BT multimedia reference monitors. Amazing Sound, Compact Form Designed to deliver a great listening experience, M-Audio's BX3BT monitors provide 120W of transparent sound inside a bold, style-driven and compact design that provides the ultimate solution for pro-grade sound. The two-way design features an acoustically inert MDF cabinet with bass reflex that provides robust lows through the black Kevlar drivers. Plus, enhanced rear ports and computer-optimized natural silk-dome tweeters deliver the full spectrum of frequencies needed for any song, movie, or video game, to sound big and lifelike. Connect Your Devices The BX3BT front and rear panel offer all the connections you need to connect any playback device. The rear panel features 1/4", 3.5mm, and RCA inputs, while the front panel features a 3.5mm aux input and a headphone connection that turns the speakers off for private listening—handy for those late nights in the home office or mixing sessions where you do not want to disturb anyone. Active Speaker Controls and EQ M-Audio BX3BT features controls on the rear panel that let you customize the EQ and active speaker placement. High-EQ and Low-EQ controls enable anyone to add or cut some extra rumble or clarity to their music. The M-Audio BX3BT features a Left/Right Active Speaker Position Switch letting you choose which speaker is sounding from the left or right side. Limitless Creativity with MPC Beats Software DAW—Effects and Instruments Included The M-Audio BX3BT comes bundled with MPC Beats, the powerful music-making and recording desktop software DAW for Mac and PC, based on iconic MPC hardware. Featuring a full array of musical instrument plug-ins, effect plug-ins, and audio and drum samples, MPC Beats is the best way to start making great-sounding music quickly.
