Product specification sheet

Product	M-Audio BX3 Graphite 3.5" 20W Active Studio Monitors (Pair)
SKU	BX3GRAPHITEPAIRXUS
Brand	M-Audio
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$185.00
Available quantity	100

Description

HIGHLIGHTS 3.5" Carbon-Fiber Woofer 1" Silk-Dome Tweeter 10W per Channel Computer-Optimized Waveguides 1/4", 3.5mm, and RCA Inputs 3.5mm Headphone Jack Volume Control Rear Bass Port 1 2 3 4 Designed to provide audio engineers, musicians, and music producers with quality monitoring for home and project studios, the M-Audio BX3 Graphite is a pair of 2-way speakers engineered to offer accurate sound and easy configuration for producers, podcast creators, mixing engineers, and others who require a critical ear. A single amplifier in the active speaker powers the 3.5” carbon-fiber woofer and 1” silk-dome tweeter on both monitors. Each speaker features a rear-mounted bass port that delivers extended bass response, while the tweeter’s redesigned computer-engineered waveguide yields a wide sweet spot with minimized high-frequency scatter. Volume control is provided, and the monitors have 3.5mm, RCA, and balanced 1/4" jacks, so you can connect whatever kind of device you choose. Plug headphones into the 3.5mm front-panel output for private listening. New 3.5" Carbon-Fiber Drivers Loaded with premium circuitry and components such as 3.5" carbon-fiber low-frequency drivers and 1" silk-dome tweeters with computer-optimized waveguides, the BX3 Graphite studio monitors deliver amazing sound at an outstanding value with 20 watts of powerful amplification. Boasting a compact and premium look that fits into any desktop or studio environment, the vinyl-wrapped acoustically inert MDF enclosures feature a bass-reflex design and rear ports that provide extended low-end response. Ready to Connect Perfect for studio production, multimedia creation, as well as entertainment, the BX3 Graphite studio monitors feature a stereo 3.5mm front-panel input, as well as stereo 1/4" and RCA rear panel inputs that enable you to connect to virtually any audio source with ease. The BX3 Graphite studio monitors conveniently include a stereo 3.5mm to stereo 3.5mm cable and stereo 3.5mm to RCA cable to make these connections right out of the box. When it's time for late-night production, the 3.5mm headphone output on the front panel mutes the speakers, so you can listen to your audio with privacy. You can even customize which speaker you would like to use for controlling the volume by using the left/right speaker switch located on the rear panel. At a Glance 3.5” carbon-fiber low-frequency drivers; 1” natural silk-dome tweeters New computer-optimized tweeter waveguide for precise imaging Optimized rear ports for extended low-frequency response 20 watts of powerful and accurate sound; 10 watts per channel Left/right speaker switch for configuring which side has volume control 1/4”, 3.5mm, and RCA inputs for connecting to virtually any audio sources Front 3.5mm headphone jack mutes speaker output Front 3.5mm input for quick connection of a smartphone or other audio source Acoustically inert MDF cabinet with bass-reflex design for deep, rich sound Includes 1/8” speaker interconnect cable, 3.5 to 3.5mm cable, and 3.5mm to RCA cable
