Description

87Keys Gasket Mount Mechanical Keyboard□ATTACK SHARK X87 keyboard adopts Tenkeyless ultra-portable compact layout saving space for your desk still offering all the keys you need for gaming and work. Keyboard adopts a gasket structure with five layers of sound-absorbing material. There is PORON for buffering between the keyboard PCB board and the casing, which can effectively reduce the noise and vibrate of the keys, optimize the sound of the switches, and provide better office or gaming experience. □Triple Mode Multi-Device Connection□The keyboard supports three connection methods, including BT5.0, 2.4GHz wireless and USB wired mode. It can be connected to up to five devices at the same time, and switch between them easily by FN and key combination keys. No limits about your keyboard connection to Meet your needs in different use scenarios of life, study, work and entertainment. Note: There are options for Mac/Win, BT/USB/2.4G on the back of the keyboard. □Hot Swappable & Pre-lubed Strawberry Switches□This custom mechanical keyboard with hot-swappable base supports 3-pin or 5-pin switches replacement, full-keys anti-ghosting each keystroke is registered with accuracy and stability. Paired with pre-lubed strawberry switches, bring smooth typing feeling and pleasant typing sound, provide fast response for exciting game. □Cool RBG Backlit & Music Rhythm Lighting Effect□The keyboard features 15 stunning RGB lighting effects with LED strips, and over 16.8 million RGB colors. it has 10 unique music rhythm lighting effects that vary with the rhythm of the music. The FN key combination supports adjusting backlight brightness/speed settings Tailor lighting patterns to suit your preferences, creating a desktop atmosphere that adapts to your mood. □Side-Printed PBT and OEM Keycaps Ergonomic Design□The side-printed design is making for giving your keyboard an incredibly sleek and clean feel. These PBT keycaps are made of textured, high-grade PBT and are resistant to wear, friction, and solvents. Ensure a better user experience. Ergonomic keyboard with OEM profile keycaps and foot support allows you to adjust the angle of the keyboard according to your personal preference. Make your wrist comfortable while typing and playing games for long periods of time. □Programmable Customize Keyboard □Using programmable drivers, customizing the keyboard allows you to set shortcut keys and key combinations according to your usage habits. Full button support for macro recording and editing increases the probability of winning games and improve work efficiency. In addition, can be customized through drivers and recording custom backlighting. Note: If any questions about the Keyboard and Driver Downloads, please feel free contact us in a timely manner, and we will reply as soon as possible within 24 hours to help you solve the problem.
