Available quantity	100

Description

75% Wired 8KHz Magnetic Keyboard With Custom Lightbox, 0.005mm RT Accuracy, Support RT/Snap Tap/DKS/MT/TGL Compact 75% Layout with Function Row & Adjustable Feet This 75% layout keyboard restores the function row and navigation keys in a compact size, balancing portability and performance. Two-stage adjustable feet offer three ergonomic angles for comfortable long sessions. Snap Tap & Rapid Trigger for Pro Gaming The R85 HE supports Snap Tap for faster directional changes and Rapid Trigger for fluid movement, quick stops, and precise control. Perfect for FPS and rhythm games where split-second timing matters. Stunning RGB Lightbox & Per-Key RGB Backlight The ATTACK SHARK R85 HE wired gaming keyboard features a customizable RGB lightbox with five preset effects and dynamic per-key RGB backlighting. Perfect for gamers, typists, and RGB enthusiasts, it offers stunning illumination that syncs with your setup for immersive desk aesthetics. 0.005mm RT Precision & Adjustable Magnetic Switch Equipped with Hall effect magnetic switches, every key’s actuation can be adjusted from 0.1mm–3.3mm in 0.005mm steps, giving unmatched precision and control. Ideal for esports players who need fast trigger response and consistent key accuracy. 8000Hz Polling Rate & 0.08ms Latency Experience true competitive speed with an 8000Hz polling rate, 256KHz scan rate, and 0.08ms latency. Every keystroke is captured instantly with zero delay—designed for FPS, MOBA, and competitive gaming performance. Five-Layer Sound-Dampening Foam for Deep Thock Built with a top-mount structure and five layers of acoustic foam, the R85 HE delivers rich, muted “thock” feedback for a premium typing experience. It minimizes hollow noise and enhances keystroke feel—ideal for mechanical keyboard lovers seeking quiet performance. Web & Software Control with Volume Knob Easily customize RGB, actuation points, and Rapid Trigger through a real-time web driver or downloadable software. The rotary volume knob offers instant audio control, with all settings saved to onboard memory.
