Description

MindsEye is a narrative driven, single-player action-adventure thriller set in the near-future fictional desert city of Redrock. Featuring best-in-class cinematics, high-intensity driving, and explosive combat from game director Leslie Benzies. Features & details Play as Jacob Diaz, a former elite soldier fitted with the MindsEye, a mysterious neural implant that haunts him with fragmented memories of a covert mission that changed his life forever. Fight to uncover the truth in a world where AI, high-tech experimentation, and unchecked military power shape every encounter. Jacob isn’t the only one searching for answers forces working from the shadows may be more powerful and dangerous than he ever imagined. Get ready for intense combat on foot behind the wheel and in the air where every decision is the difference between survival and defeat. Step into Redrock the backdrop of MindsEye, where advanced technology is an inescapable part of daily life. AI, robotics, and neural implants have reshaped society, bringing both new opportunities and risks.
