Unit price	\$25.00
Available quantity	100

Description

Tired of delayed inputs ruining your matches? The GameSir Nova 2 Lite Multi-Platform Tri-Mode Wireless Game Controller (Luminous White) delivers fast response, flexible connectivity, and dependable control for competitive and casual gaming alike. Whether you play on PC, Switch, Android, or iOS, this GameSir Gamepad offers broad compatibility without changing your gaming habits. Its Hall Effect technology, tri-mode connectivity, and customizable controls make it a practical choice for gamers searching for a reliable Multiplatform Gaming Controller. If you are looking for the GameSir Controller Price in Bangladesh, this model is available at PCB Store with trusted after-sales support across Bangladesh. Why Choose the GameSir Nova 2 Lite Multi-Platform Tri-Mode Wireless Game Controller? Modern games demand fast reactions. A controller with inconsistent inputs or stick drift quickly becomes frustrating. The GameSir Nova 2 Lite focuses on responsive performance by combining Hall Effect sticks, Hall Effect triggers, and a 1000Hz polling rate over wired and wireless dongle connections. Its tri-mode connectivity supports Bluetooth, wireless dongle, and wired operation. That flexibility makes it an excellent PC and Mobile Game Controller for players who regularly switch between gaming platforms. How Does the GameSir Nova 2 Lite Perform? The controller uses GameSir Hall Effect sensing sticks, reducing the risk of stick drift while delivering consistent movement accuracy. Hall Effect triggers also provide smoother actuation and include trigger stops for players who prefer faster response during competitive gameplay. Ultra-low button and stick latency helps commands register quickly. Combined with the mechanical circular D-pad, directional movements feel accurate during platformers, fighting games, and retro titles. Dual asymmetric rumble motors add tactile feedback without affecting overall controller balance. Key Features That Improve Everyday Gaming Several practical features separate this controller from standard wireless gamepads. Tri-mode connectivity with Bluetooth, wireless dongle, and wired support Hall Effect sticks designed for long-term durability Hall Effect triggers with adjustable trigger stops Mechanical circular D-pad for responsive directional inputs 1000Hz polling rate through wired and wireless dongle modes Dual macro back buttons supporting mapping and macro recording Dual asymmetric vibration motors Anti-slip laser-textured grips Full customization through GameSir Connect App and GameSir App The included 600mAh rechargeable battery also supports the optional smart auto start-stop charging station, compatible with the Super Nova charging dock.
