Available quantity	100

Description

Tri-mode Connectivity: Wired for Xbox, 2.4G & Wired for PC, and Bluetooth for Android. The G7 Pro supports seamless connectivity across Xbox, PC, and Android. Effortlessly switch between modes using the convenient physical mode switch.

TMR Sticks: The G7 Pro features GameSir's Mag-Res TMR sticks, combining Hall Effect durability with traditional potentiometer performance. This advanced technology delivers stable polling rates for smooth, drift-free gaming with low power consumption.

Hall Effect Analog Triggers: The GameSir precision-tuned Hall Effect analog triggers provide unmatched smoothness and linear input for precise control. Featuring clicky Micro Switch trigger stops, gamers can easily switch based on their preferences.

1000Hz Polling Rate on PC: Experience ultra-responsive gaming with a 1000Hz polling rate on PC, available through both wired and 2.4G wireless connections. This ensures instantaneous input registration, reducing lag and optimizing your performance for the most competitive gameplay.

GameSir Nexus App: The G7 Pro is compatible with the upgraded GameSir Nexus app, which brings a significant upgrade over the original. It introduces powerful new features such as gyro settings, stick curve adjustments, and button-to-mouse mapping, giving you deeper customization and more control than ever before.

PC Gyro Aiming & 4 Extra Buttons: Built-in gyroscope (PC-only) maps to sticks, buttons, or mouse for precise and intuitive gameplay. Four customizable buttons (L5/R5 bumpers + lockable back buttons) enable macros and quick actions.

Smart Auto Start-Stop Charging Station: The G7 Pro comes with a Smart Auto Start-Stop Charging Station and a built-in 1200mAh battery, delivering extended battery life for hours of uninterrupted gameplay. Simply place the controller on the station to begin charging, and pick it up to play.
