SKU	gs-48458174562526
Brand	Razer
Category	Video Games
Minimum order quantity	1
Unit	—
Unit price	$200.00
Available quantity	100

Description

INTEGRATED ADJUSTABLE LUMBAR SUPPORT SYSTEM - You need this, there is no way around it. A solid posture is paramount when seated and gaming for several hours a day! The support system allows you to finely tune the curve of the backrest on your lower back, this allows you to modify the pressure put on your lower back when seated. Full extension of 5cm directly built into the frame of the TAROK ULTIMATE video game chair. MULTIFUNCTIONAL TILT MECHANISM - For full control of your seat tilt the Multifunctional mechanism allows you to tilt back with minimum effort at the smoothest setting, or create a push back when stiffened. All controlled below the seat. The mechanism also allows you to lock the tilt of the seat in any position with step-less control. Height adjustment is also controlled by the mechanism. 3D SOFT COAT PADDED ARMRESTS - The 3D armrests provide you with the features required to enjoy the TAROK PRO game chair in any position, whether you are seated with recline, or playing a game with a controller. Simply adjust the armrest directly with your hand, no need to press a button to do any feature. The 3D Armrest allows movement forward and backward, rotation in a circular movement, and height adjustments. DURABLE PU - We have used high-grade PU Leather across the full chair on the TAROK ULTIMATE, finely fitted onto the fully custom high density molded foam on the full metal frame. Ensures a tightly fitted PU, and a great look and feel – craftsmanship and comfort are the top priorities on the ULTIMATE. XL 60MM PU COVERED PRESSURE RELEASE WHEELS - The soft PU Covered wheels across the full TAROK line up of RAZER EDITION Gaming Chairs allows for a smooth glide on any surfaces given by the XL 60mm wheels. Made of high-quality materials they will never wear out – no matter how many RPM you spin in them.
