Available quantity	100

Description

DJI Osmo Pocket 3 Creator Combo Capture steady and smooth motion videos with the DJI Osmo Pocket 3. Boasting a wide range of upgrades over its predecessor, the Osmo Pocket 3 features a 1″ CMOS sensor that ensures high-quality, low-noise footage acquisition even in high-contrast environments and with resolutions up to UHD 4K120. Three built-in microphones capture stereophonic sound while reducing ambient noise, and new software enhancements bring ActiveTrack 6.0 to your fingertips for precise subject tracking in both photo and video modes with smart horizontal and vertical shooting modes as well as D-Log M and 10-bit support. Adjust settings and check the live view of your camera using the integrated 2″ touchscreen, which is rotatable to allow for quick orientation selection. The lightweight and very compact 3-axis gimbal stabilizer provides reliability when shooting action sequences or for capturing sporting events and other action-laden content for family videos, concerts, and other live streaming applications. A microSD card slot facilitates internal recording and a rechargeable integrated battery provides operating time of up to 166 minutes when fully charged using an optional USB charger and the included USB-C PD cable. Wi-Fi and Bluetooth wireless connectivity are also supported. Pocket Sized with 2″ Rotatable Screen Pocket-sized and extremely portable, the DJI Osmo Pocket 3 is a tiny camera that lets you single-handedly record memorable moments. Equipped to stabilize movement and take sharp photos and smooth videos, it gives you the freedom to create magic at hand. Quick Capture for Vlogging Anywhere, Anytime Built for travel, the Pocket 3 is compact and always ready to capture any special moment. Single-handed operation allows you to begin shooting in one second to capture photos and videos at the speed of life and in your preferred vertical or horizontal aspect ratio. High-Definition Panorama Get the whole mountain range with 180° panorama or everyone in a group selfie with a 3×3 panorama. You won’t believe how such a small camera can take such a big shot. Dynamic Framing with ActiveTrack 6.0 and Face Auto-Detect No matter how you move, ActiveTrack 6.0 ensures that you and your friends are always kept in the shot. Tracked subjects can be firmly locked for stable vlogging and the built-in golden ratio composition frames your subject aesthetically as you track their movements. Sound That Surrounds The Pocket 3 effectively reduces ambient noise and records omnidirectional stereo sound. Even in crowded environments like concerts, it can precisely identify sound sources for more immersive audio. Time-Lapse, Hyperlapse, and Slow Motion in 4K at 120 fps Time-lapse lets you turn hours into seconds. Motion-lapse adds smooth camera movement. Hyperlapse lets you travel through time. Whether you’re shooting a butterfly taking flight or a stroll through a field, you can capture every moment in slow motion in 4K at 120 fps. DJI Mimo App for Wi-Fi and Bluetooth Connectivity Monitor camera view, set parameters, and control the camera using your iOS or Android mobile device. With Wi-Fi and Bluetooth support, you can transfer, edit, and share files, as well as live stream using Wi-Fi. Fast Charging, Long Lasting Get up to 80% charge in just 16 minutes. And with over 2.5 hours of 1080p/24 fps footage when fully charged, you have more time to vlog the journey ahead. Natural Skin Tones Be camera-ready anytime you’re in frame with fine-tuned exposure for different skin tones to achieve direct output with clear and glowing complexions. Hollywood-Quality Smoothness The 3-axis motorized gimbal allows this tiny camera to create big-screen results. Webcam Use the Pocket 3 as a webcam for online meetings, video chats, and other scenarios for a stable view and ultra-clear audio. Timecode After multicamera shooting, use the timecode function to efficiently synchronize footage between different cameras. LightCut App The LightCut app supports wireless connection and the One-Tap Edit feature for effortless creation. It can intelligently match your shots with exclusive templates to generate epic videos, making it easy to document any moment. Plus, there is no need to download footage during the editing process, which saves storage space on your smartphone. Live Streaming with Various Shooting Modes Pocket 3 supports high-definition live streaming and is loaded with creative modes and features to keep your inspiration running at full power. It supports SpinShot, Motionlapse, digital zoom, Panorama, and much more, all just a couple of taps away. DJI Mic 2 Clip-On Transmitter/Recorder with Built-In Microphone (2.4 GHz, Shadow Black) The DJI Mic 2 Clip-On Transmitter/Recorder is a black transmitter with both built-in microphone and onboard recording capabilities for seamless audio recording. Use in tandem with a separately available receiver, expand your preexisting Mic 2 wireless system, or connect to a mobile device/Osmo series camera via Bluetooth. The transmitter utilizes both 2.4 GHz digital and Bluetooth technology to communicate with the dual-channel receiver or even your DJI Osmo Pocket 3 or Action 4 camera from up to 820′ away.

Onboard recording is facilitated thanks to the transmitter’s internal 8GB storage for up to 14 hours of recorded audio. The transmitter supports 24-bit audio at 48 kHz and even allows for 32-bit float audio recording in tandem with the DJI Mimo app. This recording mode provides a high dynamic range for complex sound environments. Bluetooth connection with the Mimo app can toggle intelligent noise cancelling during video recording with compatible devices. A built-in rechargeable battery can run for up to 6 hours at a time and can be recharged via USB-C cable or separately available charging case. Capture a wider image in every frame with this Wide-Angle Lens for Osmo Pocket 3 from DJI. The lightweight lens attaches to your Osmo Pocket 3 to expand the camera’s field of view to 108°. Power your DJI Osmo Pocket 3 and increase its operating time by approximately 62% with this Battery Handle from DJI. Boasting an internal, rechargeable 950mAh battery, the lightweight handle weighs only 2.2 oz and supports hot swapping. It features a USB-C port that allows you to connect external audio devices, such as wired microphones, wireless microphone receivers, or wired headphones. A 1/4″-20 thread at the bottom of the unit facilitates mounting on a tripod, slider, or other supporting accessory. Place your DJI Osmo Pocket 3 on any flat surface using the Osmo Mini Tripod. Boasting a non-slip design and TPU plastic material for a comfortable grip, this compact, portable, and foldable mini tripod features a 1/4″-20 mounting screw and can also be used as an added handle for your Pocket 3 or any other small device or accessory that has a 1/4″-20 threaded mounting port.
