Unit price	$35.00
Available quantity	100

Description

Advanced System and Rich Content□This smart projector is equipped with the latest Android TV 11.0 system, featuring a wide range of built-in applications. It provides easy access to mainstream streaming platforms such as Prime Video, and YouTube, offering a vast content library of over 500,000 movies and TV shows. Combined with the Mali-G31 GPU and WiFi 6 technology, it delivers a smooth and intelligent viewing experience. □Multi-Scenario Flexible Projection□The smart movie projector supports 180° free rotation, allowing for easy projection on walls, ceilings, or floors without complicated setup. It is suitable for various scenarios, including home theaters, leisure entertainment, children's education, video conferences, or online teaching, meeting diverse usage needs. □Intelligent Correction and Immersive Sound□The HY300 PRO pico projector the built-in automatic keystone correction quickly adjusts the image to its ideal state, while manual focus ensures a clear picture in an instant. The 360-degree surround sound system provides an immersive auditory experience, turning every viewing session into an audiovisual feast. □High-Definition Picture Quality and Smooth Connectivity□ Supporting 1080P/4K resolution, the projector utilizes advanced LED technology to deliver bright and realistic projection effects. Seamless connectivity is achieved through WiFi 6 and Bluetooth 5.0, compatible with both 2.4G and 5G networks, ensuring smooth streaming. With 160 ANSI lumens brightness and a 1500:1 contrast ratio, it offers stunning visual effects. □Quiet Operation and Multi-Functional Expansion□The efficient cooling system keeps operational noise below 25 decibels, providing a quiet viewing environment. Equipped with HDMI, USB, and audio interfaces, it can easily connect to external devices such as laptops, TV sticks, and USB drives, enabling seamless compatibility and expanding entertainment possibilities.
