Product specification sheet

Product	Onikuma G67 67-Key RGB Wired Hot-Swappable Mechanical Keyboard (Magnetic Switch)
SKU	gs-48235666211038
Brand	Onikuma
Category	Peripherals
Minimum order quantity	1
Unit	—
Unit price	$35.00
Available quantity	100

Description

Rapid Trigger 60% Gaming Keyboard - This mini keyboard ultra-high polling rate of 8000 Hz increases accuracy and minimizes keyboard input latency. Keyboard ultra-fast response time up to 10 times faster than traditional mechanical keyboards. Perfect for FPS players, music and rhythm game players, and codeword workers, Rapid Trigger keyboard reduces the annoyance of the tool to make you more focused and immersive. Topographic Themed Custom Keyboard - 67key compact layout keyboard with topographic pattern on both shell and keycaps. Metal PCB plate, Make the keyboard stable and feel better, can stabilize the performance of the magnetic switches. Double layers of sound-absorbing cotton and ergonomic two-stage foot design improve the stability of the keyboard while delivering a better gaming experience. Hall Effect Mechanical Gaming Keyboard - The keyboard is equipped with womier custom hall effect magnetic switches, offering ultra-accurate typing experiences adjustable in 0.1mm. From 0.08mm to 3.4mm customizable trigger points, each key can be personalized according to the minimum unit of 0.1mm. In addition, the press sensitive and reset sensitive can be set individually through the software to match the key press habits of different people for different types of games. Keyboard New Web-Software - Ultra-low latency is just the beginning of what magnetic switches bring to the table for gamers. The true revolution lies in features like rapid trigger (RT), SOCD (Snap Tap), and advanced functions like DKS/MT/TGL. These cutting-edge innovations give magnetic switch keyboard users a decisive edge that will only grow stronger as the community continues to evolve. More Power to You with New web-based software driver. The web-based driver offers easy access without installation and compatibility across all operating systems. 16.8 Million RGB Keyboard & Side-Prined PBT Keycaps - keyboard features 16.8 million RGB lighting color. With 15 pre-set lighting effects to add a great atmosphere to the game. Lighting brightness and speed can be adjusted by the knob or the FN+key combination. Side-prined keycap keyboard are currently a new trend worldwide. As the keycap that combines thermal sublimation and double shot craft in one, it not only retains the exquisite pattern, but also transmits light.Side lettering to avoid direct light upward.
