Description

Capcom’s newest IP, PRAGMATA, is an all-new sci-fi action-adventure game with unique hacking gameplay. Set on the moon in the near future, the story follows an unlikely duo on a mission to escape a lunar station controlled by a hostile station AI. In this single-player game, players control both spacefarer Hugh and the enigmatic android Diana. Each character has their own distinct skills and abilities, and they must work together to hack, shoot, and overcome obstacles in search of a way back to Earth. Features & details Out-of-This-World Adventure – Stranded on a lunar space station, Hugh encounters Diana, a mysterious android resembling a young girl. While searching for a way back to Earth, they fight to survive against Bots directed to “neutralize” intruders. Hack & Shoot – Use each character’s distinct abilities to take down enemies. In combat, Diana can hack foes to expose weaknesses so Hugh can blast them with weapons. This unique fusion of gameplay offers an action-packed experience like no other. Space Exploration – Teamwork also extends to traversing the station. Utilize the thrusters in Hugh’s futuristic suit to dash and hover around while Diana hacks security systems to solve puzzles. Only together can they overcome all obstacles. Collect and Customize – Gather materials while exploring the station to unlock upgrades, build out a diverse arsenal of weapons, obtain new outfits, and more. Once you’re ready, use the new gear in battle and take on even greater challenges!
