Product	HyperX Pulsefire Warp Wireless Gaming Mouse - Black
SKU	gs-48039497924830
Brand	HyperX
Category	Peripherals
Minimum order quantity	1
Unit	—
Unit price	$50.00
Available quantity	100

Description

High-Speed Wireless Connectivity:- HyperX Pulsefire Warp Wireless gaming mouse offers gaming-grade 2.4GHz high-speed wireless connectivity with a 1000Hz polling rate. The wireless connection is stable and lag-free, you won’t notice any missed clicks or the connection breaking down while you are using the mouse. The wireless design also helps you in getting better tracking without worrying about entangled cables. Gaming-Grade Pixart Optical Sensor:- HyperX has featured a high-performance Pixart 3335 optical sensor on the Pulsefire Warp Wireless. It strikes the perfect balance between high-speed tracking and lightweight design. The mouse gets an adjustable DPI between 400 to 16000 DPI values, all thanks to the high-performance optical sensor from Pixart. Improved Tracking With Better Grip & Lightweight Design:- The Pulsefire Warp Wireless weighs just only 74 grams which allow for swift movement of the mouse on larger surfaces. A lightweight mouse is also easier to control resulting in instant improvement in tracking and aiming. Pulsefire Warp Wireless also has a comfortable grip with its ergonomic shape and design. Solid 100 Hours of Battery Life:- With the HyperX Pulsefire Warp Wireless never worry about running out of battery life. The mouse offers a strong battery backup of up to 100 hours with a single charge. You simply won’t have to charge it frequently. High-Quality Kailh Micro-Motion Switches:- HyperX Pulsefire Warp Wireless gaming mouse features smooth clicking, tactile feel, and high-performance Black Mamba 8.0 micro motion switches from Kailh. They have an extremely satisfying feel and offer long durability of over 80 million clicks.
