Brand	HyperX
Category	Peripherals
Minimum order quantity	1
Unit	—
Unit price	$65.00
Available quantity	100

Description

Designed to capture less unwanted noise: Engineered from the inside to reduce vibrations from the outside, with a built-in suspension system that delivers shock mount benefits in a compact, no-fuss design. An All-In-One mic that doesn’t ask for more: Everything you need is built in — foam pop filter, tiltable stand, and mic arm threads. No extras required. Just clear sound and a smart design for a setup that keeps things simple. Fits in any gaming setup: Tilt-adjustable with a weighted base for stability, ready to use out of the box. Built-in 3/8" and 5/8" threads offer easy mounting to compatible mic arms for added versatility. Audio Filters Customizable via HyperX NGENUITY: Customize sound with high-pass, low-pass, or voice enhancement filters - reduce rumble, soften sharp tones, and boost voice clarity. Save settings to the mic for consistent sound anywhere. Tap-to-Mute with LED Indicator: Control your mic with a simple tap. Red LED on when live, off when muted. Plug and Play USB Connection: Start recording fast with simple USB-C to USB-A connectivity and no setup hassle. Optional software unlocks advanced features for deeper customization. Cardioid polar pattern: The cardioid polar pattern captures sound best from the front while reducing pickup from the sides and rear, making it ideal for focused vocal recording. Studio Quality Recording: Capture high-resolution audio with a high-quality condenser capsule, 24-bit bit depth recording and 96kHz sampling rate.
