Description

Magnetic docking station and visible battery level: Equipped with an exclusive fast charging dock, this gaming mouse can be used for 5 hours with a 10-minute charge. The mouse tip is designed with a screen that shows the power level so you can check the remaining power level at any time. In addition, the adjustable RGB lights of the charging station will meet your preferences in terms of different colors. More Modes, More Choice: X2 Pro wireless gaming mouse supports three connection modes to meet different usage scenarios. It allows you to quickly switch between devices thanks to the mode switch button at the bottom of the mouse. You can use 2.4GHz wireless or Bluetooth mode, or switch to traditional wired mode using the included USB-C cable Transparent Case & 3D RGB Lighting: Unlike ordinary wireless computer mouse, the transparent coating can better display X2 Pro RGB lighting effects, creating an unprecedented, deep and immersive lighting experience. The surface of the coating is coated with an oleophobic coating to reduce fingerprints and other dirt without being affected by light transmission. Silent click and 5 adjustable DPI: The mouse has left and right silent buttons, reducing wet noise by 90%. Whether you're playing until you play to the library or cafe, you can use the mouse as you think without worrying about disturbing other clicking noises. 5 adjustable DPI (1200/1600/2000/2400/4000) for smoother and freer control. Smart Charging & Auto Sleep: Rechargeable via USB A to Type C cable for easy, faster and more stable charging. Smart standby mode protects battery and prolongs usage time. The mouse activates after 2 minutes to save energy and you can wake it up by clicking any button or moving the mouse.
