Description

The MOXOM 30000mAh Power Bank MX-PB156 is a high-capacity portable charger featuring PD20W (Power Delivery) for Apple/Type-C and 22.5W SCP (Super Charge Protocol) for Huawei, often including built-in cables. It features a smart LCD digital display for battery level, 3-4 output ports for simultaneous charging, and multiple safety protections. Key Features and Description:Massive Capacity: 30000mAh lithium polymer battery provides 7-10 full charges for smartphones, ideal for long trips.Fast Charging Protocols: Supports 22.5W Super Charge Protocol (SCP) for fast Huawei charging and 20W Power Delivery (PD) for fast-charging iPhones and other USB-C devices.Convenience & Display: Includes a built-in LCD digital display that clearly shows the remaining battery percentage.Multi-Device Charging: Typically equipped with multiple USB-A and Type-C outputs, allowing users to charge multiple devices (phones, tablets, notebooks) at once.Safety & Design: Features multiple safety protections including overcharge, short circuit, and overcurrent protection. Often designed with a portable lanyard.Input/Output: Supports rapid recharging of the power bank itself, often via Type-C. This power bank is suited for heavy users, travelers, and those who need to keep multiple devices powered for several days
