Available quantity	100

Description

Take Enemies down fast: Up to 4 Different Burst Modes Specification Platforms: iOS&Android Connection: Plug-and-Play Battery Capacity: 90mAh Charging Time: 1-2 Hour(s) In The Box: Gamesir F4 Controller/Type-C Cable/Manual/Thank-You Note Package Size: 82.3 * 45 * 25.5mm F4 controller is a deadly weapon to take enemies down fast. F4 controller is armed with the “selector” as the same as the real M4A1 does, which you can select a suitable burst mode according to the battlefield status. The “selector” includes as follows: Default mode (one click, one shot) 3-burst mode (1 click, 3 shots) 6-burst mode (1 click, 6 shots) 9-burst mode (1 click, 9 shots) Get Started Fast: Plug and Play Without any drivers or complicated app or Bluetooth, REAL plug-and-play! Compared to the traditional Bluetooth mobile gaming controller, owing to GameSir exclusive magic, F4 controller kills the connection latency, faster 4 times than Bluetooth controller! Become Focus Fast : Unique Designing Foldable Wings F4 controller is crafted by the aesthete’s hands, which is not only a controller for playing but also a rare piece of art. Folded, it is like a falcon in rest; unfolded, it seems a nimble falcon pursuing its prey, which is the same as you do with F4 in the gaming. Invisible Switch Similar to the shape of falcon, the F4 controller’s shape seems to be formed by nature. Without any useless lines and parts, F4 controller’s power switch is set as an invisible one: when you use it, it will turn on naturally. Delicate inside its inside delicate design is beyond and above your imagination: every button, every circuit, and every position is refined and tested again and again. In a word, F4 controller enjoys aesthetic shape and fast plug-and-play gaming experience. Fast Response: Short-Distance and Clicky Buttons F4 controller’s all buttons are tested extremely to ensure up to 5 million times lifespan. More importantly, its buttons reach E-sport standard——excellent clicky feel and extremely fast-response. Fast to Charge: Ultra-Low Power Consumption Time flies... during gaming. Given that, F4 controller is quipped with Ultra-Low Consumption Power system. Via USB Type-C cable, it only takes 1 -2 hour(s) for F4 to be charged fully. But it can company you for up to 30 hours. If you forget it, it can hang in there for 200 days at most.
