SKU	gs-47542877585630
Brand	Xiaomi
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	$32.00
Available quantity	100

Description

From the manufacturer Physical lens shielding, protecting privacy at the source The camera lens can be hidden upwards into the body for physical shielding, ensuring security and peace of mind. MJA1 security chip, finance-grade data protection Each chip has a unique key and credential, effectively ensuring data communication and storage security, and providing reassuring finance-grade protection. 3MP ultra-clear visual experience With 3MP and a resolution of 2304x1296, the camera displays 2K images, providing more subtle details and more realistic visuals. Enhanced infrared night vision for clear images on dark nights The camera has six built-in infrared illuminators and can capture clear images even on dark nights without producing red light or disturbing your family's sleep. Full colour night vision for longer colour image time With the assistance of the built-in high-sensitivity image sensor, the camera can better adapt to low-light environments and retain colour images for a long period of time. Human detection and active alert The camera supports local AI-based human detection to detect humans more accurately and quickly without on-cloud processing. When someone is detected, the camera automatically sends an alert to your smartphone.
