Description

256GB – 8GB RAM Snapdragon XR2 Gen 2 4.5X Visual Resolution TruTouch Haptics Meta Quest 3S Mixed Reality Headset – Snapdragon XR2 Gen 2 – 4.5X Visual Resolution – TruTouch Haptics The Meta Quest 3S Mixed Reality Headset is an advanced device designed for immersive experiences, powered by the Snapdragon XR2 Gen 2 processor. It boasts an impressive 4.5X visual resolution, enhancing clarity and detail for both virtual and augmented reality applications. One of its standout features is TruTouch Haptics, which provides realistic tactile feedback, making interactions more engaging and lifelike. Whether you’re exploring virtual worlds, playing games, or engaging with augmented reality content, the Quest 3S delivers a seamless blend of digital and physical experiences, ensuring users are fully immersed in their environments. With its ergonomic design and enhanced performance, the Quest 3S is ideal for gamers, developers, and anyone looking to explore the potential of mixed reality. Meta Quest 3S Snapdragon XR2 Gen 2 Chipset: Faster performance, enhanced visuals, and smoother gameplay. Crisp Visuals: 1832 x 1920 resolution with 773 PPI and a 100% sRGB color gamut for vibrant, realistic visuals. Mixed Reality Integration: Transforms environments, blending the physical and digital worlds with seamless precision. Hand and Controller Tracking: Hybrid tracking system powered by computer vision and machine learning, supporting hand-tracking and TruTouch variable haptics for greater immersion. Ergonomic Design: Soft strap design with hard strap availability and a glasses spacer for added comfort and flexibility. Long Battery Life: Powered by a 4324 mAh battery for up to 2.5 hours of uninterrupted usage.
