Description

Meetion GM23 RGB Gaming Mouse is Cool looking and designed for gaming. Streamlined design enhances grip. 12800dpi high-resolution optical sensor, the resolution can be changed by driver software. Backlight and additional keys allow you to enjoy the convenience of control in any game. Gaming sensors work on any surface. The DPI change button lets you adjust the speed of mouse movement, and a color indicator reminds you which settings are currently in use. The button design on the left can help you move forward or backward quickly, improving efficiency. GM230 lighting changes depending on the DPI mode you choose. Thanks to this, you will never be mistaken about which mode is being used right now. Classic black and white 2 colors to choose from, to better meet your diverse needs. The mouse is designed with a soft rubber wheel, which is soft and skin-friendly, and will not hurt your hands for a long time. Using high-performance sensors, the control is smooth and precise, and the movement is flexible and free to meet your precise positioning requirements. The mouse works autonomously and without the need to install additional software. When connected to a computer via a USB port, you can be up and running in seconds. Optimized the response rate for the popular games, Combine with 8 grade DPI, make the DPI switching more precise and more enjoy the games.
