Description

RGB Gaming Microphone Havit GK52 The Havit GK52 microphone is an ideal choice for streamers and more. It reliably records your voice while eliminating any ambient noise. The audio resolution of 48 kHz/16 bit allows for excellent recording quality, and the built-in knob will make it easy to adjust the volume. The RGB backlighting gives it a gaming feel, creating a unique atmosphere during gameplay or live broadcasts. Clear sound, no distortion The microphone of the Havit GK52 is focused on recording sound from the front, while minimizing interference from other directions. As a result, your voice always remains clear and clean, regardless of the environment you are in. The device is perfect for live broadcasting, singing or playing online games. High quality recordings Audio resolution of 48 kHz/16 bit is another advantage of the Havit GK52 microphone. It allows you to record audio in high quality, which is important for professional sound effects. This ensures that your recordings will sound perfect and satisfy even the most demanding listeners. Dynamic RGB backlighting The microphone Havit was designed with gaming enthusiasts in mind. It features dynamic RGB backlighting, which gives it a unique character, creating a unique atmosphere in your room. From now on, your gameplay will become even more immersive!
