Description

Product description An Officially Licensed Controller for PlayStation Introducing the Backbone One – PlayStation Edition. Inspired by the look and feel of the PS DualSense wireless controller, the Backbone One gives users tactile controls to enhance their gaming experience on iPhone. Pair with the PS Remote Play App and you can play your PlayStation games anywhere with ease. Simply plug your iPhone into the Backbone One and start playing any App Store games and game streaming services that support controllers. Console Quality Controls Designed in partnership with the team behind the PS5 DualSense controller, the Backbone features tactile buttons, responsive triggers, and clickable thumbsticks. The controller's rounded edges are designed to naturally fit in the hand for the most comfortable gaming experience. Lowest Latency Connection Simply connects to your iPhone's Lightning port. This direct connection allows for almost no latency when playing games, bringing it closer to a console experience. It's also extremely low-power, taking less energy than a pair of Lightning-connected headphones. Pass-Through Charging + 3.5mm Headset Jack The Backbone Lightning port allows you to charge while you game and the 3.5mm headset jack gives you another way to listen to audio. Works With Any iPhone Compatible with the latest iPhones (iOS 15 and up), the Backbone stretches to easily fit the largest or smallest iPhone on the market. *Adapter included for a better experience on iPhone 13 Pro and iPhone 13 Pro Max Play Any Controller Support Game and Streaming Service Play games like Diablo Immortal, Call of Duty: Mobile, Apex Legends Mobile, Minecraft, Genshin Impact, and thousands of other titles. The Backbone One controller works with any mobile game or streaming service that supports controllers. Backbone App All Your Games in One Place The Backbone app is an all-in-one launcher that aggregates all your games and platforms, plus the latest content, games and news, into one hub, even making recommendations about what to play. Next-Level Game Recording The Backbone app assists you in visualizing your most action-packed moments automatically, allowing you to show off your best moments with ease and now supports 60 FPS game recording, last 15 seconds recording and more. Connect with Friends + Twitch Streaming Get instantly notified when friends are online and create/join parties to voice chat while you play together. You can now go live on Twitch instantly and share the link with your friends. We've refined the entire process to take less than 10 seconds. Play on Any Screen Use the Backbone with other devices like the iPad, Mac, or PC to play services like Xbox Cloud Gaming and Google Stadia. We have optimized performance for each device so the latency is lower than traditional Bluetooth controllers, making it optimal for cloud gaming.
