Description

Release Date April 30, 2021 Explore lush scenery on unknown islands to snap photos of Pokémon in their natural habitats Seek out and take in-game photographs of Pokémon in their native environments in the New Pokémon Snap game, only for the Nintendo Switch system! Snap photos from the NEO-ONE as you encounter and research lively wild Pokémon. You might see unexpected expressions or behaviors—Pokémon patrolling their territory, playing, or lurking in out-of-the-way spots. Investigate the mysterious Illumina phenomenon Travel to the islands that make up the Lental region. In this region, some of the Pokémon and vegetation will appear to have a special glow. Research these Pokémon alongside Professor Mirror as you explore dense jungles, vast deserts, and more! Your observations of Pokémon thriving in the wild may help unravel the truth behind the Illumina phenomenon. The Pokémon pictures you take will be used to build your very own Pokémon Photodex! Save, edit, and share your favorite Pokémon photos Save photos to your personal in-game album to edit and adjust them. When you complete a course, you can adjust the brightness, blur, zoom and other aspects of your photo in Re-Snap mode. Then, add stickers, frames, and filters to add a personal touch. Share your favorite photos with family and friends in-game*. You can also see what kinds of photos everyone else is taking. See something you like? Award a Sweet! medal. *Nintendo Switch Online membership (sold separately) and Nintendo Account required for online features. Not available in all countries. Internet access required for online features. Terms apply. Features & details See a different side of Pokémon in a new photo-snapping adventure, only on Nintendo Switch Explore unknown islands with scenery like lush jungles and tropical beaches throughout your journey Research various Pokémon in their natural habitats and capture Pokémon behaviors that you don’t normally see Meet Professor Mirror and work with him to uncover the mystery of the Illumina phenomenon and Pokémon with a special glow that can be found in the Lental region Take in-game photos to make your very own Pokémon Photodex
