SKU	cm-Air-Auto Hair Curler
Brand	Dreame
Category	Hair Care
Minimum order quantity	1
Unit	—
Unit price	$149.00
Available quantity	100

Description

Dreame Air-Auto Hair Curler The Dreame Air-Auto Hair Curler is an automatic styling tool designed to create defined curls with less manual effort. With one-touch curling, a smart reverse motor, bi-directional 360° rotation, intelligent heat control, cool-set technology, and 500 million negative ions, it is built to create smoother, shinier, longer-lasting curls with reduced reliance on excessive direct heat. Key Features One-Touch Automatic CurlingSimplifies styling by automatically guiding and wrapping hair around the barrel. Smart Reverse MotorUses negative pressure to guide hair onto the barrel, then reverses airflow to help cool and set the curl. Curl + Cool Set in One FlowCombines shaping and cooling to help improve curl definition and hold. 360° Bi-Directional RotationSupports both inward and outward curls for more flexible styling. MCH Intelligent Heating SystemDelivers more even and controlled heat for consistent styling. 500 Million Negative IonsHelps reduce frizz and support a smoother, shinier finish. Low-Heat Airflow StylingUses controlled heat and airflow to shape curls without depending only on high direct heat. Main Feature Sections Automatic Curling with Less EffortThe Air-Auto Hair Curler uses airflow and motor-assisted wrapping to guide hair around the barrel, making curling easier and more consistent. Smart Reverse Motor for Better HoldAfter the curl is formed, the motor reverses to deliver cool air, helping set the curl and improve bounce and longevity. Controlled Heat for Hair CareThe MCH heating system is designed to distribute heat evenly while powerful airflow assists with shaping, helping reduce unnecessary heat exposure. Flexible Curl DirectionThe 360° bi-directional rotation allows quick switching between inward curls and outward flicks for symmetrical or more varied looks. Technical Specifications Product Type: Automatic Hair Curler Brand: Dreame Model: Air-Auto Hair Curler Styling Method: Automatic airflow-assisted curling Motor Function: Smart reverse motor Curl Direction: Bi-directional Rotation: 360° Heating System: MCH Cool-Set Technology: Yes Negative Ions: Up to 500 million Frizz Control: Yes Automatic Hair Wrapping: Yes Use Case: Curls, waves, inward curls, outward flicks, styling and finishing Styling Performance The Dreame Air-Auto Hair Curler is designed for: Defined curls Soft waves Inward curls Outward flicks Symmetrical styling Frizz control Smoother finishing Long-lasting curl definition Hair Care The styling system combines: Controlled MCH heating High-speed airflow Cool-set finishing Negative ion technology This approach is designed to help reduce excessive direct heat while supporting smoother and shinier-looking hair. Best Use Cases Daily curl styling Soft waves Defined curls Frizz-prone hair Quick styling routines Users who struggle with manual curling irons Users who want automatic inward and outward curling Compatibility Suitable for multiple hair types depending on section size and styling technique Best results depend on hair condition, thickness, moisture level, and curl direction selected Smaller sections generally provide more controlled results
