## Description

Insta360 X5 Battery The Insta360 X5 Battery is a high-capacity replacement or spare battery designed specifically for the Insta360 X5. With 2400mAh capacity, up to 135 minutes of 5.7K30fps recording, cold-weather performance down to -20°C, and an included protective battery case with dual SD card slots, it is built for longer shooting sessions and travel. Key Features Designed for Insta360 X5Made specifically for use with the Insta360 X5 camera. 2400mAh CapacityProvides extended recording time for longer shoots. Up to 135 Minutes RecordingSupports up to 135 minutes of 5.7K30fps recording under specified conditions. Cold-Resistant PerformanceDesigned to operate reliably down to -20°C. Included Battery CaseProtects the battery during transport and includes two SD card storage slots. Main Feature Sections Extended Shooting TimeThe 2400mAh battery provides up to 135 minutes of 5.7K30fps recording, helping reduce battery changes during longer filming sessions. Built for Cold ConditionsThe battery is engineered for operation down to -20°C, making it suitable for skiing, winter travel, and other cold-weather activities. Smarter StorageThe included battery case protects the battery and adds two SD card slots for convenient organization while travelling. Technical Specifications Product Type: Camera Battery Brand: Insta360 Model Compatibility: Insta360 X5 Battery Capacity: 2400mAh Rated Energy: 9.34Wh Nominal Voltage: 3.89V Limited Charge Voltage: 4.48V Maximum Recording Time: Up to 135 minutes at 5.7K30fps Operating Temperature: -20°C to 40°C Charging Temperature: 0°C to 40°C Cold-Weather Support: Yes Battery Performance Capacity: 2400mAh Recording Time: Up to 135 minutes at 5.7K30fps Minimum Operating Temperature: -20°C Maximum Operating Temperature: 40°C Actual runtime varies depending on resolution, frame rate, camera settings, temperature, and usage conditions. Storage & Care For safer long-term use: Allow the battery to cool before charging Charge only between 0°C and 40°C Avoid liquid exposure Do not store the battery fully discharged Recharge approximately every 3 months during long-term storage Recommended storage range is -10°C to 35°C at under 75% relative humidity Best Use Cases Long Insta360 X5 shooting sessions Travel Action sports Skiing and winter filming Spare battery for extended trips 360° video recording Outdoor content creation Compatibility Compatible With: Insta360 X5 Designed specifically for the X5 battery system What’s in the Box Insta360 X5 Battery × 1 Battery Case × 1 The supplied battery case includes two SD card storage slots.
