Description

Philips 4000 Series Stacked Dual Basket Air fryer NA460 The Philips 4000 Series Stacked Dual Basket Airfryer NA460 is designed for families who want to cook two dishes at the same time without taking up the countertop space of a wide dual-basket airfryer. With a 10L total capacity, two stacked 5L baskets, 2750W power, vertical Rapid Air Technology, synchronized cooking, 6 presets, 13 cooking methods, viewing windows, ceramic coating, and dishwasher-safe removable parts, it is built for fast, flexible everyday cooking. Key Features 10L Total CapacityTwo 5L baskets provide space for larger family meals. Stacked Dual-Basket DesignUses up to 45% less countertop space compared with a traditional side-by-side dual-basket layout. Vertical RapidAir TechnologyCirculates hot air from the top for crisp, evenly cooked food. Cook 2 Dishes at OncePrepare different foods independently in each basket. Sync Finish FunctionAutomatically coordinates cooking times so both baskets finish together. 6 Presets & 13 Cooking MethodsSupports baking, grilling, roasting, reheating, and more. Easy-View WindowsCheck food while cooking without pulling out the baskets. Ceramic Non-Stick CoatingPFAS-free, durable, scratch-resistant, and easier to clean. Shake ReminderAlerts you when food should be shaken for more even results. HomeID App RecipesProvides recipe ideas, step-by-step guidance, and tailored settings. Main Feature Sections Double the Meals, Less Counter SpaceThe stacked design places two 5L baskets vertically, giving the NA460 a 10L total capacity while reducing the width required on the kitchen counter. Family-Size CapacityThe airfryer can handle up to approximately 1.4kg of fries, 2kg of vegetables, or 24 chicken drumsticks. Each 5L basket can also fit a whole chicken up to around 1.2kg. RapidAir for Crisp, Even ResultsVertical Rapid Air Technology circulates hot air around the food to help create a crispy outside and tender inside with less added fat than traditional deep frying. Two Dishes Ready TogetherThe sync function automatically adjusts cooking timing between the two baskets so separate dishes can finish at the same time. Technical Specifications Product Type: Stacked Dual Basket Air fryer Brand: Philips Series: 4000 Series Model: NA460 Power: 2750W Voltage: 220–240V Frequency: 50Hz Total Capacity: 10L Basket Capacity: 2 × 5L Number of Baskets: 2 Technology: RapidAir Temperature Range: 40–200°C Time Range: 0–60 minutes Programs: 6 presets Cooking Methods: 13 Interface: Digital Reheat Function: Yes Sync Finish: Yes Copy Settings: Yes Viewing Windows: Yes Shake Reminder: Yes Automatic Shut-Off: Yes Cool-Touch Handles: Yes Ceramic Coating: Yes Dishwasher-Safe Parts: Yes Non-Slip Feet: Yes Cord Length: 1m Color: Black Handle Color: Charcoal Grey Primary Material: Plastic Secondary Material: Metal Product Dimensions: 46.9 × 23.3 × 39.9cm Product Weight: 8.98kg Cooking Capacity Total Capacity: 10L Upper Basket: 5L Lower Basket: 5L Fries: Up to approx. 1.4kg Vegetables: Up to approx. 2kg Chicken Drumsticks: Up to 24 Whole Chicken: Up to approx. 1.2kg per basket Actual capacity depends on food size, shape, and recommended spacing for airflow. Cooking Functions The NA460 supports multiple cooking styles, including: Air frying Baking Grilling Roasting Reheating Cooking from frozen Crisping Everyday meal preparation The 6 presets provide faster access to common cooking settings. Dual Basket Controls Sync Finish: Coordinates both baskets to finish together Copy Function: Duplicates cooking time and temperature between baskets Independent Cooking: Different foods can use different settings Viewing Windows: Check progress without opening the baskets Cleaning & Maintenance Ceramic non-stick coating PFAS-free coating Dishwasher-safe removable parts Easy-clean baskets Viewing windows reduce unnecessary basket opening Allow components to cool before cleaning. Best Use Cases Family meals Two-dish dinners Chicken and fries Meat and vegetables Meal preparation Frozen foods Baking and roasting Users with limited countertop width Users replacing a conventional oven for smaller meals Energy & Cooking Efficiency Philips states that the dual-basket airfryer can cook up to 40% faster and use up to 65% less energy than an oven under specific test conditions. Actual time and energy savings depend on food quantity, recipe, oven type, temperature, and cooking duration. Compatibility Suitable for 220–240V electrical systems Designed for household cooking HomeID app can be used for compatible recipes and guidance Do not exceed recommended basket capacity, as overcrowding can reduce crisping and airflow.
