Description

Philips Daily Collection Metal Kettle HD9350 The Philips Daily Collection HD9350 is a durable 1.7L electric kettle made with food-grade SUS304 stainless steel for reliable everyday use. With 1850–2200W power, fast concealed heating element, spring lid, removable micro-mesh filter, automatic shut-off, boil-dry protection, water-level indicator, and cordless 360° base, it combines fast boiling with simple daily convenience. Key Features 1.7L CapacitySuitable for preparing multiple cups of tea, coffee, or hot water. Food-Grade SUS304 Stainless SteelDurable metal construction designed for safe everyday water boiling. 1850–2200W Fast BoilingPowerful concealed heating element heats water quickly. Micro-Mesh FilterRemovable filter captures limescale particles as small as 200 microns. Multi-Safety SystemIncludes boil-dry protection and automatic shut-off when the water is ready. Spring LidPush-button opening helps reduce contact with hot steam and provides a large opening for cleaning. Water-Level IndicatorMakes it easy to see how much water is inside. 360° Cordless BaseAllows convenient lifting and repositioning from different directions. Main Feature Sections Durable Stainless Steel ConstructionThe HD9350 uses food-grade SUS304 stainless steel in its metal water-contact parts, making it suitable for frequent everyday boiling. Fast and Easy BoilingThe concealed flat heating element and 1850–2200W power provide efficient boiling while also making the kettle interior easier to clean. Cleaner Water with Micro-Mesh FilterA removable filter at the spout captures small limescale particles down to 200 microns for clearer pouring. Built-In Safety FeaturesThe kettle automatically switches off when water reaches boiling point and includes protection against operation without sufficient water. Technical Specifications Product Type: Electric Kettle Brand: Philips Series: Daily Collection Model: HD9350 Capacity: 1.7L Power: 1850–2200W Voltage: 220–240V Frequency: 50–60Hz Primary Material: Metal Stainless Steel Type: Food-grade SUS304 Heating Element: Concealed flat stainless steel element Automatic Shut-Off: Yes Boil-Dry Protection: Yes Filter: Removable micro-mesh filter Filter Particle Size: Down to 200 microns Lid: Push-button spring lid Power Indicator: Illuminated switch Water-Level Indicator: Yes Base: 360° cordless base Cord Storage: Yes Product Dimensions: 15 × 22 × 25cm Product Weight: 973g Produced In: China Safety & Convenience Automatic shut-off when water is ready Protection against boil-dry operation Large spring-lid opening for easier cleaning Easy filling through the lid or spout Illuminated power indicator Cord storage underneath the base Energy-Saving Cup Indicators The water-level markings help users boil only the amount of water required. Boiling a smaller quantity instead of unnecessarily filling the kettle can reduce both electricity and water consumption. Best Use Cases Tea and coffee preparation Instant drinks Hot water for cooking Daily home or office use Family kitchens Users who prefer stainless steel kettles Quick morning hot-water preparation Compatibility Designed for 220–240V electrical systems Intended for boiling water Do not operate below the recommended minimum water level or above the maximum fill mark.
