Product	Philips DryCare Pro Hairdryer
SKU	cm-BHD272
Brand	Philips
Category	Hair Care
Minimum order quantity	1
Unit	—
Unit price	$70.00
Available quantity	100

Description

Philips DryCare Pro Hairdryer The Philips DryCare Pro Hairdryer is designed for users who want fast drying power with a more professional airflow experience. With a high-performance AC motor, up to 130 km/h air speed, 2100W power, and ThermoProtect temperature setting, it helps dry and style hair faster while offering additional protection against overheating. Key Features 2100W High-Performance DryingCreates powerful airflow for quicker drying and easier styling. Professional AC MotorBuilt for strong performance and developed for the professional market. Up to 130 km/h Air SpeedDelivers fast airflow for efficient drying results. ThermoProtect Temperature SettingHelps protect hair from overheating while keeping strong airflow. Fast Drying PerformanceSuitable for users who want quicker results compared to basic low-power dryers. Styling-Friendly AirflowHelps support daily drying and styling routines with more speed and control. Main Feature Sections Fast Drying with AC Motor PowerThe Philips DryCare Pro uses a high-performance AC motor designed to create strong airflow. This makes it practical for users who want faster drying and a more powerful hairdryer experience. 2100W Drying PerformanceWith 2100W of power, the dryer delivers a strong combination of airflow and speed, helping reduce drying time and making styling easier. ThermoProtect for Extra CareThe ThermoProtect setting provides an optimized drying temperature to help reduce the risk of overheating the hair while maintaining powerful airflow. Technical Specifications Product Type: Hairdryer Brand: Philips Series: DryCare Pro Power: 2100W Motor Type: AC motor Air Speed: Up to 130 km/h Temperature Feature: ThermoProtect setting Use Case: Fast drying, daily hair drying, styling support, home use, and professional-style drying performance Drying Performance Power: 2100W Airflow Speed: Up to 130 km/h Motor: High-performance AC motor Care Feature: ThermoProtect temperature setting Drying speed depends on hair length, thickness, moisture level, and selected heat or airflow setting. Best Use Cases Fast daily hair drying Thick or longer hair drying Styling before work or outings Users who want stronger airflow Home use with professional-style power Reducing drying time compared to compact dryers Compatibility Suitable for personal hair drying and styling Best for users who need stronger airflow and faster drying Results depend on hair type, drying technique, and selected settings Use ThermoProtect when extra heat care is preferred.
