Description

Hoco HX10 Desktop Eye Caring Lamp The Hoco HX10 Desktop Lamp is designed for users who need a compact eye-caring desk light for reading, studying, laptop work, bedside use, and small workspaces. With 2W light source power, 3000K–5000K color temperature, 200Lm brightness, 80Ra color rendering, soft flicker-free light, 3 brightness levels, 3 color temperatures, touch control, clamp mounting, multi-angle adjustment, 1200mAh battery, and Type-C charging, it is a practical lamp for desks, tables, shelves, and study areas. Key Features Desktop Eye Caring LampDesigned for comfortable reading, studying, and daily desk lighting. Soft Flicker-Free LightHelps provide smoother lighting for longer use around books, notebooks, and screens. 3 Color TemperaturesSupports 3000K–5000K lighting for warm, natural, and cooler light preferences. 3 Brightness LevelsAllows users to adjust brightness based on time of day and task. Touch ControlSimple touch operation for easy lighting control. Multi-Angle AdjustmentLets users position the light direction more easily. Clamp Mounting DesignSaves desk space by attaching to compatible desk edges, shelves, or tables. Rechargeable BatteryBuilt-in 1200mAh lithium battery provides 3–5 hours of use in battery mode. Type-C ChargingCharges through Type-C input in approximately 4 hours. Cable-Powered UseCan also be connected directly to a power source for longer sessions. Main Feature Sections Comfortable Lighting for Study and WorkThe Hoco HX10 is made for users who want a small desk lamp for reading, studying, writing, or working beside a laptop. Its soft flicker-free light makes it suitable for daily indoor use. Adjustable Brightness and ColorWith 3 brightness levels and 3 color temperatures, users can choose warmer light for relaxed use or brighter cooler light for focused tasks. Space-Saving Clamp DesignThe clamp mounting style keeps the lamp off the main desk surface, making it useful for compact desks, student rooms, office tables, and bedside setups. Flexible Lamp PositioningThe multi-angle adjustment allows users to direct the light where needed, whether over a book, keyboard, notebook, or workspace. Rechargeable and Plug-In UseThe 1200mAh battery gives 3–5 hours of battery-mode use, while direct power connection is better for long study or work sessions. Technical Specifications Product Type: Desktop Eye Caring Lamp Brand: Hoco Model: HX10 Light Source Power: 2W Color Temperature: 3000K–5000K Color Rendering Value: 80Ra Lumen Value: 200Lm Brightness Levels: 3 levels Color Temperature Modes: 3 modes Light Type: Soft light, no flickering Adjustment: Multi-angle adjustment Mounting Place: Desktop Mounting Method: Clamp Control Method: Touch control Battery: 1200mAh lithium battery Use Time: 3–5 hours in battery mode Charging Time: Approx. 4 hours Charging Input: Type-C Operating Voltage / Current: 5V / 1A Material: ABS + electronic components Included Accessory: Charging cable × 1 Dimensions: 450 × 120 × 62mm Weight: 175g Use Case: Reading, studying, office desk lighting, bedside use, laptop work, and compact workspace lighting Lighting Modes Color Temperature Range: 3000K–5000K Brightness: 3 adjustable levels Light Output: 200Lm Color Rendering: 80Ra The lighting modes make the HX10 suitable for different daily situations, from relaxed evening use to focused desk work. Battery Life & Charging Battery Capacity: 1200mAh Battery Mode Use Time: 3–5 hours Charging Time: Approx. 4 hours Charging Input: Type-C Direct Power Use: Supported Actual battery time depends on brightness level, color mode, battery condition, and whether the lamp is used wirelessly or connected to power. Best Use Cases Study desk lighting Reading light Laptop workspace lighting Bedside use Student room use Small office desks Shelf or table clamp setup Users who want a compact rechargeable lamp Users who need adjustable brightness and color temperature Compatibility Suitable for compatible desk edges, shelves, and table surfaces that can hold the clamp securely Can be charged through a compatible 5V / 1A USB power source Can be used while connected directly to power Best performance depends on clamp stability, surface thickness, light angle, and brightness setting.
