Product	Hollyland Lark M3 Combo 4TX & 2RX
SKU	cm-Ho-Lark-M3-ultimate-combo
Brand	Hollyland
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$199.00
Available quantity	100

Description

Hollyland LARK M3 Combo 4TX & 2RX Wireless Microphone System The Hollyland LARK M3 Combo is an ultra-compact professional wireless microphone system designed for multi-person interviews, content production, events, and commercial shoots. Supporting up to four transmitters with advanced 48kHz / 32-bit float audio, AI noise cancellation, independent voice tuning, four-track recording, and transmission up to 300m, it gives creators greater control over complex multi-speaker recordings. Key Features Up to 4 Transmitters & 4 ReceiversSupports flexible multi-person recording setups. 48kHz / 32-Bit Float AudioCaptures a wide dynamic range with more flexibility for correcting audio levels in post-production. AI Noise CancellationIntelligently reduces traffic, wind, air conditioning, running water, and other environmental noise. 4 Independent Audio TracksRecord multiple speakers separately for greater post-production control when used with the supported hot shoe setup. 8 Vocal PresetsChoose different voice profiles and fine-tune them through the app. One-Tap Vocal EnhancementIncludes de-essing and voice processing for clearer speech. Up to 300m / 1000ft TransmissionDesigned for stable long-range wireless audio in open, unobstructed environments. Ultra-Compact DesignBuilt for travel, mobile production, interviews, and lightweight camera setups. Main Feature Sections Professional 32-Bit Float AudioThe LARK M3 delivers 48kHz / 32-bit float audio output, providing increased dynamic range and more flexibility when recovering recordings that are unexpectedly quiet or loud. Advanced AI Noise CancellationDeep-learning noise processing analyzes the surrounding environment and helps suppress both continuous background noise and sudden sounds while keeping speech intelligible. Multi-Person Recording Made EasierWith support for multiple transmitters, independent vocal settings, and four isolated tracks, the system is particularly useful for interviews, podcasts, panel discussions, and multi-presenter productions. Custom Voice TuningEight built-in vocal presets can be adjusted through the app. Each transmitter can use its own profile, allowing different speakers to be optimized independently. Technical Specifications Product Type: Wireless Microphone System Brand: Hollyland Model: LARK M3 Package: Combo 4TX & 2RX Maximum Transmitters Supported: Up to 4 Maximum Receivers Supported: Up to 4 Audio Resolution: 48kHz / 32-bit Float Signal-to-Noise Ratio: 70dB Maximum SPL: 125dB AI Noise Cancellation: Yes Vocal Presets: 8 Independent Voice Tuning: Yes Independent Tracks: Up to 4 De-Essing / Vocal Enhancement: Yes Maximum Transmission Range: Up to 300m / 1000ft RF Interference Resistance: Yes App Fine-Tuning: Yes 4-Track Recording When paired with the compatible hot shoe adapter, the LARK M3 can output four independent tracks. This allows each speaker to be: Recorded separately Mixed independently Adjusted individually Processed differently during post-production This is especially useful when speakers have different voice levels or recording conditions. AI Noise Cancellation The AI system is designed to reduce sounds including: Wind Traffic Vehicle horns Air conditioning Running water Constant environmental noise Sudden background sounds Actual effectiveness depends on noise level, microphone placement, and recording environment. Audio Performance Sample Rate: 48kHz Bit Depth: 32-bit Float SNR: 70dB Maximum SPL: 125dB The high maximum SPL helps accommodate louder voices and sound sources, while 32-bit float provides additional headroom for post-production. Best Use Cases Multi-person interviews Podcasts YouTube production Commercial shoots Events Documentary filming Outdoor recording Content creators Camera productions Multi-speaker presentations Compatibility Compatibility depends on the receiver, adapters, camera, smartphone, or recording equipment being used. Four-track independent recording specifically requires the supported hot shoe adapter and compatible recording setup. What’s in the Box For the supplied 4TX & 2RX Combo, the core package includes: Hollyland LARK M3 Transmitters × 4 Receivers × 2 Compatible cables and recording accessories Furry windshields Storage / carrying system
