Description

Hoco UA33 Type-C to HDTV Adapter The Hoco UA33 Type-C to HDTV Adapter is designed for users who need to connect a compatible Type-C phone, laptop, tablet, or computer to an HDTV display. With a Type-C male input, HDTV female output, 4K 30Hz screen mirroring and split-screen support, audio and video synchronization, OTG support, plug-and-play use, hot-swap support, aluminum alloy + ABS construction, and lightweight 18g design, it is a practical adapter for presentations, movies, videos, office work, and extending display connectivity. Key Features Type-C to HDTV AdapterConverts a Type-C port into an HDTV female interface for compatible displays. 4K 30Hz Output SupportSupports up to 4K resolution at 30Hz for high-definition screen display. Screen Mirroring SupportAllows compatible devices to mirror the screen to an HDTV monitor or TV. Split Screen SupportSupports extended or split-screen display use when supported by the connected device. Audio and Video SynchronizationDesigned to transmit both picture and sound together for smooth viewing. OTG Function SupportSupports OTG function for compatible Type-C devices. Plug and PlayEasy connection without complicated setup on supported devices. Hot-Swap SupportAllows connection and disconnection while the system is running, depending on device support. Solves Missing HDTV Port IssueUseful for laptops or devices that do not have a built-in HDTV interface. Compact Metal BuildAluminum alloy and ABS material provide a durable and lightweight design.
