Description

Hoco UPA32D Clever USB-A to 3.5mm Audio Converter The Hoco UPA32D Clever Audio Converter is designed for users who need a simple way to connect 3.5mm wired earphones, headphones, speakers, or headsets to a USB-A device. With a USB-A male input, 3.5mm female audio output, built-in DAC digital decoding chip, Hi-Fi lossless transmission, oxygen-free copper wire, gold-plated 3.5mm socket, aluminum alloy shell, and nylon braided cable, it is a compact and durable audio adapter for computers, laptops, and compatible USB-A devices. Key Features USB-A to 3.5mm Audio ConverterConverts a USB-A port into a 3.5mm audio output for compatible wired audio devices. Built-In DAC Digital Decoding ChipHelps process digital audio for stable and clear sound output. Hi-Fi Lossless TransmissionDesigned to deliver clean audio transmission for music, calls, videos, and daily listening. Gold-Plated 3.5mm SocketProvides a stronger and more stable audio connection. Oxygen-Free Copper WireSupports better signal transmission and long-term audio performance. Aluminum Alloy ShellDurable metal housing improves wear resistance and daily-use durability. Nylon Braided CableHelps reduce cable wear and improves lifespan compared to basic plastic cables. Wide CompatibilitySuitable for compatible USB-A devices that support USB audio output. Compact 15cm LengthShort and practical design for laptops, desktops, and portable setups. Lightweight 7.6g DesignEasy to carry in a laptop bag, pouch, or accessory kit.
