Unit price	$48.00
Available quantity	100

Description

CPL Filter for DJI Osmo Pocket 4P The CPL Filter for DJI Osmo Pocket 4P is designed for creators who want cleaner outdoor footage with richer colors, better contrast, and reduced glare from reflective surfaces. With a precision-fit design, quick installation, slim gimbal-safe frame, and circular polarizing effect, it is a practical accessory for travel filming, POV vlogging, landscape shots, water scenes, city content, and bright outdoor recording. Key Features Enhances Color and ContrastHelps create richer skies, deeper greens, and more vibrant-looking footage in outdoor scenes. Reduces Glare and ReflectionsMinimizes reflections from water, glass, roads, and other non-metallic reflective surfaces. Precision-Fit for DJI Osmo Pocket 4PDesigned to fit securely on the DJI Osmo Pocket 4P camera lens. Quick InstallationEasy to attach and remove, making it useful for creators who need fast setup while filming. Slim Gimbal-Safe DesignKeeps the setup lightweight and compact to help maintain smooth gimbal movement. Better Outdoor FootageUseful for bright sunlight, travel videos, beaches, city scenes, car windows, and landscape shots. Technical Specifications Product Type: CPL Camera Filter Filter Type: Circular Polarizer / CPL Compatible Device: DJI Osmo Pocket 4P Main Function: Reflection reduction and color enhancement Installation: Quick-fit design Design: Slim gimbal-safe frame Use Case: Outdoor filming, POV vlogging, travel videos, landscape shots, water scenes, road reflections, glass reflection control, and bright daylight recording Best Use Cases Outdoor video recording Travel vlogging POV filming Landscape footage Beach and water scenes City filming Road and car reflection reduction Bright daylight shooting DJI Osmo Pocket 4P creator setups More vibrant social media content Compatibility Compatible with DJI Osmo Pocket 4P Compatibility with other DJI Osmo Pocket models should not be assumed unless confirmed by the package or supplier. Best results depend on lighting angle, shooting direction, filter rotation, and the reflective surface being filmed.
