Product	NEEWER CPL Filter for DJI Osmo Pocket 4P
SKU	cm-FL-P35
Brand	Neewer
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	$48.00
Available quantity	100

Description

NEEWER CPL Filter for DJI Osmo Pocket 4P The NEEWER CPL Filter for DJI Osmo Pocket 4P is designed for creators who want better outdoor image control, reduced reflections, and improved color contrast when filming or shooting with the DJI Osmo Pocket 4P. With a circular polarizer design, quick snap-on mount, slim gimbal-friendly frame, 12x telephoto zoom support, included screen protector, cleaning cloth, and storage case, it is a practical accessory for POV vlogging, travel videos, outdoor filming, photography, and content creation. Key Features Made for DJI Osmo Pocket 4PDesigned exclusively for DJI Osmo Pocket 4P / 4 Pro as a gimbal camera accessory. Circular Polarizer FilterHelps reduce reflections from non-metallic surfaces such as glass and water. Improves Color and ContrastEnhances saturation and contrast for more vivid outdoor footage and cleaner-looking images. Rotatable Polarization ControlRotate the filter to adjust the polarization effect depending on light direction and scene conditions. Supports 12x Telephoto Zoom UseDesigned to help maintain sharper telephoto results even when using 12x zoom. Quick Snap-On MountAttaches directly onto the camera lens for fast setup before filming or shooting. Slim Gimbal-Friendly FrameThe slim design helps maintain smooth gimbal operation without blocking movement. Useful for Outdoor FilmingIdeal for travel, water scenes, city reflections, car windows, glass surfaces, landscapes, and bright daylight shooting. Screen Protector IncludedHelps protect the touchscreen from scratches while keeping touch sensitivity. Creator Accessory KitIncludes useful accessories such as a cleaning cloth and storage case. Main Feature Sections Reflection Control for Outdoor ContentThe CPL filter helps reduce glare and reflections from surfaces like water, windows, and glass. This is useful for outdoor vlogging, travel shots, vehicle footage, and lifestyle content where reflections can make footage look less clean. Better Color Saturation and ContrastBy controlling polarized light, the filter can improve contrast and make colors appear richer, especially in bright outdoor environments. Quick Mounting for Fast ShootingThe snap-on design allows creators to attach the filter quickly without complicated setup, making it practical for run-and-gun filming. Designed for Gimbal UseThe slim frame helps the Osmo Pocket 4P maintain normal gimbal movement. This is important because bulky filters can affect balancing or movement on compact gimbal cameras. Technical Specifications Product Type: CPL Camera Lens Filter Brand: NEEWER Model: FL-P35 Compatible Device: DJI Osmo Pocket 4P / 4 Pro Filter Type: Circular Polarizer / CPL Mounting Type: Quick snap-on mount Polarization Adjustment: Rotatable filter adjustment Telephoto Support: Designed for use with up to 12x telephoto zoom Frame Design: Slim gimbal-friendly frame Included Protection: Touchscreen screen protector Included Accessories: Cleaning cloth and storage case Use Case: POV vlogging, video recording, photography, outdoor filming, travel content, water scenes, glass reflection control, and bright daylight shooting Best Use Cases Outdoor vlogging Travel photography POV video recording Bright daylight filming Water and beach scenes Glass and window reflection reduction Landscape shots City filming Product and lifestyle content 12x telephoto zoom shooting DJI Osmo Pocket 4P creator setups Compatibility Compatible only with DJI Osmo Pocket 4P / 4 Pro Not designed for other Osmo Pocket models unless confirmed by the package or supplier Do not stack filters Do not apply extra protectors to the gimbal area Best performance depends on lighting angle, filter rotation, scene type, and shooting conditions.
