Description

Hoco HI25 Wireless Doorbell EU Plug The Hoco HI25 Wireless Doorbell EU Plug is designed for homes, offices, shops, and apartments that need a simple doorbell solution without wiring. With wireless installation, an EU plug receiver, multiple chimes, adjustable volume, and easy pairing, it is practical for quick setup and everyday use. Its main value is convenience. The wireless transmitter and plug-in receiver make installation easier, while selectable ringtones and volume control help users adjust the doorbell to their space. Key Features Wireless doorbell system No wiring required EU plug receiver Easy installation Long wireless signal range Multiple chime options Adjustable volume Simple transmitter and receiver pairing Durable ABS material Suitable for homes, offices, shops, and apartments User-friendly daily operation Main Feature Sections Wireless Installation The Hoco HI25 can be installed without electrical wiring, making it suitable for quick setup in homes, offices, apartments, and small shops. EU Plug Receiver The receiver plugs directly into a standard EU power outlet, keeping the setup simple and clean. Multiple Chimes Choose from different ringtones to match your preference or environment. Adjustable Volume The volume can be adjusted depending on room size, noise level, or user preference. Reliable Signal Range The wireless design helps the doorbell signal reach across most rooms and floors, depending on wall thickness and installation environment. Durable ABS Build The ABS material body is designed for regular daily use and long-lasting performance.
