Description

Hoco K34 Spring Live Broadcast Tripod The Hoco K34 Spring Live Broadcast Tripod is designed for users who create photos, videos, livestreams, reels, and everyday mobile content. With a foldable selfie stick and tripod design, built-in LED light, Bluetooth remote control, and adjustable height up to 1.36m, it is a practical all-in-one tool for creators, students, sellers, and daily smartphone users. Its main value is flexible content creation in one compact accessory. It works as a selfie stick for handheld shooting or as a tripod for stable videos, live broadcasts, online meetings, and product photography. Key Features Multifunctional selfie stick and tripod Suitable for photography and video recording Built-in LED light Adjustable lighting modes Bluetooth wireless remote control Hands-free photo and video shooting Extends up to 1.36m Foldable portable design Stable tripod mode Supports smartphones from 4.5–7 inches Practical for livestreaming, reels, selfies, and content creation Main Feature Sections Selfie Stick and Tripod Design The Hoco K34 works as both a handheld selfie stick and a standing tripod, making it useful for selfies, group photos, videos, and livestreams. Built-In LED Light The integrated LED light helps improve brightness for photos and videos, especially in indoor or low-light environments. Wireless Remote Control The Bluetooth remote allows users to take photos or start recording without touching the phone, making hands-free shooting easier. Adjustable 1.36m Height The tripod extends up to 1.36m, giving more flexibility for wider shots, full-body framing, table setups, and creative shooting angles. Wide Smartphone Compatibility The phone holder supports most smartphones from 4.5 to 7 inches, making it suitable for many iPhone and Android models. Portable Creator Tool The foldable design makes it easy to carry for travel, outdoor shooting, product content, TikTok, Instagram, YouTube, and live broadcasts.
