Description

Hoco K91 Three-Axis Selfie Extendable Intelligent Gimbal Black The Hoco K91 Three-Axis Selfie Extendable Intelligent Gimbal is designed for mobile creators who want smoother videos, better selfies, and more stable smartphone recording. With 3-axis stabilization, intelligent tracking, an extendable selfie stick, and Bluetooth control, it is practical for vlogging, travel videos, live streaming, reels, and daily content creation. Its main value is smoother mobile shooting in a compact design. The foldable body, adjustable phone holder, portrait and landscape support, and comfortable grip make it easy to record creative content anywhere. Key Features 3-axis smartphone gimbal Intelligent stabilization Built-in extendable selfie stick Intelligent object tracking Face tracking support Panoramic shooting support Time-lapse recording support Wireless Bluetooth control Landscape and portrait shooting Adjustable smartphone holder Foldable portable design Rechargeable battery Ergonomic grip Premium black finish Suitable for TikTok, Instagram, YouTube, travel, vlogging, and live streaming Main Feature Sections 3-Axis Stabilization The Hoco K91 helps reduce shaking and unwanted movement, making smartphone videos look smoother and more stable. Extendable Selfie Stick Design The built-in extension allows better reach for selfies, group photos, travel clips, overhead shots, and wider creative angles. Intelligent Tracking Object and face tracking help keep the subject centered during recording, making it useful for solo creators, live streams, and moving shots. Multiple Shooting Modes The gimbal supports creative shooting options such as panoramic shots, time-lapse recording, face tracking, and video effects. Bluetooth Wireless Control Bluetooth control allows easier photo and video operation directly from the gimbal, reducing the need to touch the phone screen while shooting. Portrait and Landscape Support Quick orientation switching makes it practical for vertical social media videos, horizontal YouTube content, video calls, and live broadcasts. Foldable Travel Design The compact foldable body and carrying pouch make the gimbal easier to store and carry for travel, outdoor content, and daily use.
