## Description

Hoco GM4 Phantom Gaming Finger Sleeves The Hoco GM4 Phantom Super Conducting Silver Fiber Screen Finger Sleeves are designed for mobile gamers who want smoother control, better touch response, and less interference from hand sweat. With conductive fiber, dense weaving, and a lightweight breathable design, they help improve comfort during long gaming sessions. Their main value is smoother touchscreen performance. The thin 0.4mm design supports responsive touch control on capacitive screens, making them practical for mobile games, tablets, and touchscreen devices. Key Features Gaming finger sleeves for mobile screens Super conducting silver fiber design Nylon + conductive fiber material 15-needle dense weaving process Hot fuse stitching Lightweight 0.8g per pair Thin 0.4mm thickness Breathable and comfortable Helps reduce hand sweat impact Smooth touchscreen operation Suitable for capacitive screen devices Compatible with smartphones, tablets, and touchscreen computers Designed for mobile games such as PUBG Mobile, King of Glory, Call of Duty, and similar games
