Description

Hoco LS37 Spirit Type-C to 3.5mm Audio Converter The Hoco LS37 Spirit Type-C to 3.5mm Audio Converter is designed for users who want to connect wired earphones, headphones, or AUX cables to Type-C smartphones and devices. With a built-in DAC decoding chip, compact 0.15m length, and nylon braided cable, it provides a simple and portable solution for wired audio listening. Its main value is stable Type-C audio conversion in a lightweight daily accessory. The adapter converts Type-C male to 3.5mm female, making it useful for music, calls, car AUX connection, and wired headphone use on compatible devices. Key Features Type-C male to 3.5mm female audio converter Built-in DAC decoding chip Supports Type-C interface mobile phones 20Hz–20000Hz frequency response 116dB ±3dB sensitivity Nylon braided cable Two-color plastic injection molding Compact 0.15m length Lightweight 8g design Suitable for wired earphones, headphones, and AUX cables
