Description

Hoco LS36 USB to 3.5mm Fresh External Sound Card The Hoco LS36 USB to 3.5mm Fresh External Sound Card is designed for users who need a compact and reliable way to connect 3.5mm audio devices to a computer or supported USB device. With durable metal and braided materials, microphone support, wire control support, and a lightweight 12cm design, it is a practical audio adapter for headphones, speakers, microphones, gaming, online meetings, voice chat, and everyday computer audio use. Key Features USB to 3.5mm Audio ConversionAllows supported USB devices to connect with standard 3.5mm headphones, speakers, or microphones. External Sound Card FunctionWorks as a compact external audio solution for devices that need a 3.5mm audio connection. Microphone SupportSupports microphone input with compatible 3.5mm headsets, making it useful for gaming, meetings, calls, and voice recording. Wire Control SupportSupports compatible headset wire control functions such as volume control, play/pause, or call control depending on device and headset compatibility. Durable Metal + Braided BuildHigh-quality metal casing and braided cable help improve durability for daily use. Reduced External InterferenceMetal casing helps protect the adapter and supports clearer, more stable audio performance. Compact 12cm LengthShort cable design keeps the adapter neat and easy to use with laptops, desktops, and compact setups. Ultra-Lightweight DesignWeighs only 8g, making it easy to carry in a pocket, pouch, backpack, or laptop bag. Wide 3.5mm Device CompatibilityWorks with many standard 3.5mm headphones, speakers, headsets, and microphones. Practical Daily Audio AccessoryIdeal for replacing a missing or damaged audio port, improving headset connectivity, or adding 3.5mm support to compatible USB devices.
