Description

Hoco LS36 Fresh Type-C to 3.5mm Audio Converter The Hoco LS36 Fresh Audio Converter is designed for users who need to connect standard 3.5mm earphones to a USB Type-C device. With a Type-C male to 3.5mm female design, built-in DAC decoding chip, microphone support, wire control support, metal alloy body, nylon braided cable, and compact lightweight construction, it is a practical everyday adapter for music, calls, videos, and mobile audio use. Key Features Type-C to 3.5mm Audio ConversionAllows supported USB Type-C devices to connect with standard 3.5mm wired earphones. Built-In DAC Decoding ChipHelps convert digital audio from the Type-C port into analog audio for 3.5mm earphones. Microphone SupportSupports microphone function on compatible 3.5mm earphones for calls and voice use. Wire Control SupportAllows supported earphone control functions such as play, pause, volume, or call control depending on device and earphone compatibility. Wide Frequency ResponseCovers 20–20000Hz for everyday music, calls, podcasts, videos, and general audio playback. High Sensitivity Output116dB ±3dB sensitivity supports clear and practical audio performance. Durable Metal Alloy BuildMetal alloy housing gives the adapter a stronger and more premium feel for daily use. Nylon Braided CableReinforced braided cable improves durability and helps reduce everyday cable wear. Compact 0.12m LengthShort cable length keeps the adapter neat, lightweight, and easy to carry. Ultra-Lightweight DesignWeighs only 6g, making it easy to keep in a pocket, pouch, or laptop bag.
