Description

Hoco HI26 EU Self-Powered Wireless Doorbell The Hoco HI26 EU Self-Powered Wireless Doorbell is designed for homes, offices, shops, and apartments that need a simple doorbell solution without complicated wiring, charging, or app setup. With a self-powered transmitter that requires no battery, an EU plug receiver, multiple ringtone options, adjustable volume, durable ABS housing, and plug-and-play installation, it provides a practical audio alert system for daily use.

Key Features

- Self-Powered Transmitter**The doorbell button generates power when pressed, so it does not require batteries or charging.
- EU Plug Receiver**The receiver plugs directly into a standard EU power outlet for continuous indoor use.
- Wireless Doorbell System**Sends alerts wirelessly from the transmitter to the receiver, making installation easier than wired doorbells.
- Multiple Selectable Ringtones**Choose from different chime sounds to match your preference.
- Adjustable Volume Levels**Set the doorbell volume based on room size, noise level, or personal comfort.
- Plug-and-Play Setup**Simple receiver connection and easy transmitter mounting make it quick to install.
- No App Required**Works as a standalone audio doorbell without smartphone setup, Wi-Fi, or app control.
- No Camera Design**Ideal for users who want a simple privacy-friendly doorbell alert without video recording.
- Durable ABS Housing**Made from strong ABS material for everyday reliability.
- Suitable for Home & Office Use**Practical for apartments, houses, offices, shops, reception areas, and small businesses.
