Adjustable Ear Hook Fit The 4-level adjustable ear hooks help users find a more secure and comfortable fit for different ear shapes and sizes. Stronger Bass Placement The adjustable design brings the sound closer to the ear canal, helping deliver deeper bass and a more powerful listening experience compared with many fixed open-ear designs. Powerful 16 × 13mm Drivers Large 16 × 13mm drivers, a high-elastic diaphragm, and an hourglass-shaped chamber help produce louder sound and punchy bass for music, podcasts, and videos. Clear AI Calls Four microphones and AI noise reduction help filter background noise so voices sound clearer during calls. Smart Lid-Free Case The clear magnetic case keeps the earbuds secure while giving quick access. The built-in light bar helps show status in a modern and convenient way.
