Product specification sheet

Product	Segway GT3 Pro SuperScooter
SKU	cm-AA.06.02.02.0004
Brand	Segway
Category	Automobiles & Motorcycles
Minimum order quantity	1
Unit	—
Unit price	$2,999.00
Available quantity	0

Description

Segway GT3 Pro SuperScooter The Segway GT3 Pro SuperScooter is built for advanced riders who want extreme performance, long range, premium suspension, and smart riding technology. With dual motors, up to 7000W max power, 50mph top speed, 86-mile range, and 38% climbing ability, it is designed for riders who want a powerful SuperScooter experience. Its main value is the combination of speed, stability, and control. The GT3 Pro features adjustable hydraulic suspension, front and rear hydraulic disc brakes, S-ABS, traction control, Apple Find My support, AirLock, and a smart TFT display for a more confident high-performance ride. Key Features Up to 50mph maximum speed Dual 3500W motors 7000W maximum power 86-mile range at 15.5mph 2160Wh battery capacity 72V high-voltage platform 38% maximum climbing slope 0–30mph acceleration in 3.9 seconds Adjustable hydraulic suspension Front and rear hydraulic disc brakes Segway S-ABS braking system Traction control system 11-inch self-sealing tubeless tires IPX6 water resistance 2.4-inch smart TFT colour display Auto high/low headlight Turn indicators and emergency warning lights Apple Find My support Segway AirLock Segway Mobility App support 150kg maximum payload Main Feature Sections Dual-Motor Performance The Segway GT3 Pro uses front and rear hub motors with up to 3500W max power each, delivering strong acceleration, high-speed performance, and confident climbing on slopes up to 38%. Long 86-Mile Range With a 2160Wh battery and SegRange technology, the GT3 Pro offers up to 86 miles of range in ECO mode, making it suitable for longer rides and outdoor adventures. Adjustable Hydraulic Suspension The front double wishbone hydraulic shock absorber and rear trailing-arm hydraulic shock absorber help deliver smoother control across different road conditions. The front suspension includes 15 stiffness levels for tuning comfort or control. Hydraulic Disc Brakes with S-ABS Front and rear hydraulic disc brakes provide strong stopping power, while Segway S-ABS helps reduce skidding and improve braking stability. Smart TFT Display The 2.4-inch TFT colour display shows speed, battery level, trip data, ride status, navigation alerts, and incoming call notifications. Smart Security Features Segway AirLock can unlock the scooter automatically through the Segway Mobility App, while Apple Find My helps locate the scooter using a compatible Apple device. 11-Inch Self-Sealing Tires The 11-inch self-sealing tubeless tires are designed to improve ride stability and reduce the impact of small punctures during regular riding. Technical Specifications Product Name: Segway SuperScooter GT3 Pro Model: 060202G Dimensions: 1365 × 666 × 1370mm Folded Dimensions: 1365 × 666 × 700mm Net Weight: 53.1kg Max Payload: 150kg Recommended Age: 18–60 years old Required Height: 160–200cm Wheelbase: 1040mm Ground Clearance: 140mm Drive System: Two-wheel drive Max Speed: Approx. 80km/h / 50mph ECO Range: Approx. 138km / 86 miles SPORT Range: Approx. 72km / 45 miles RACE Range: Approx. 55km / 34 miles Max Slope: Approx. 38% IP Rating: IPX6 Operating Temperature: -10°C to 40°C Storage Temperature: -20°C to 50°C Tire Type: 11-inch self-sealing tubeless tires Tire Pressure: 29–35psi Suspension: Front double wishbone hydraulic shock absorber, rear trailing-arm hydraulic shock absorber Brake System: Front and rear disc brakes Battery Life Nominal Voltage: 72V Max Charging Voltage: 84V Nominal Energy: 2160Wh Nominal Capacity: 30Ah Charging Time: Approx. 8 ± 0.5 hours Charging Temperature: 0°C to 45°C BMS Protection: Overcharge, overheat, overdischarge, short circuit, and overcurrent protection Actual range depends on riding mode, rider weight, speed, terrain, tire pressure, temperature, and riding style. Motor and Charger Specifications Motor Type: Front and rear hub motors Nominal Power: 1700W × 2 Max Power: 3500W × 2 Charger Input: 100–240V, 50–60Hz Max Output: 84V / 4A Nominal Output: 83V / 4A Rated Output Power: 332W Waterproof / Water Resistance IP Rating: IPX6 IPX6 helps protect against strong water splashes, but the scooter should not be submerged, pressure-washed, or ridden through deep water.
